

1. Waves puzzle pieces have four sizes of joints:
flat, small, medium, and large.

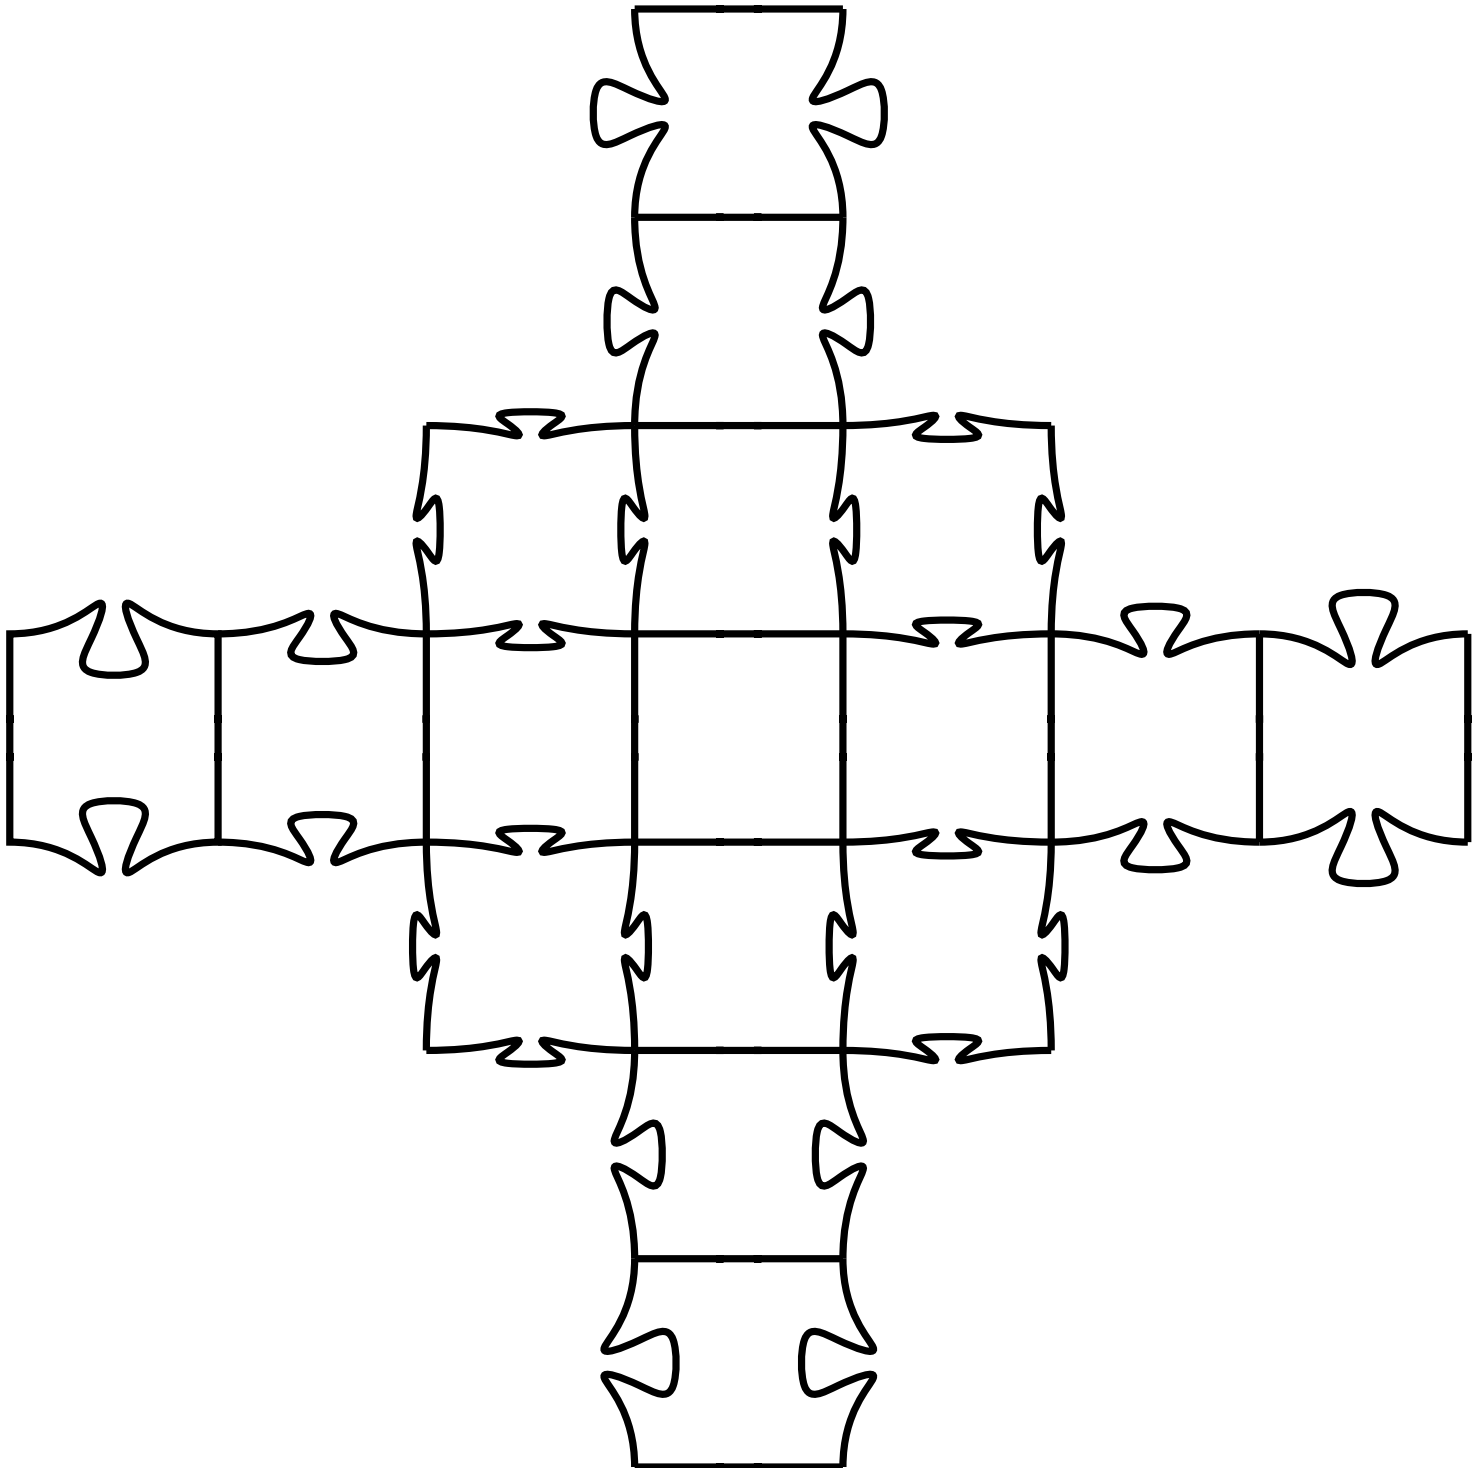

2. Begin with the square center piece.

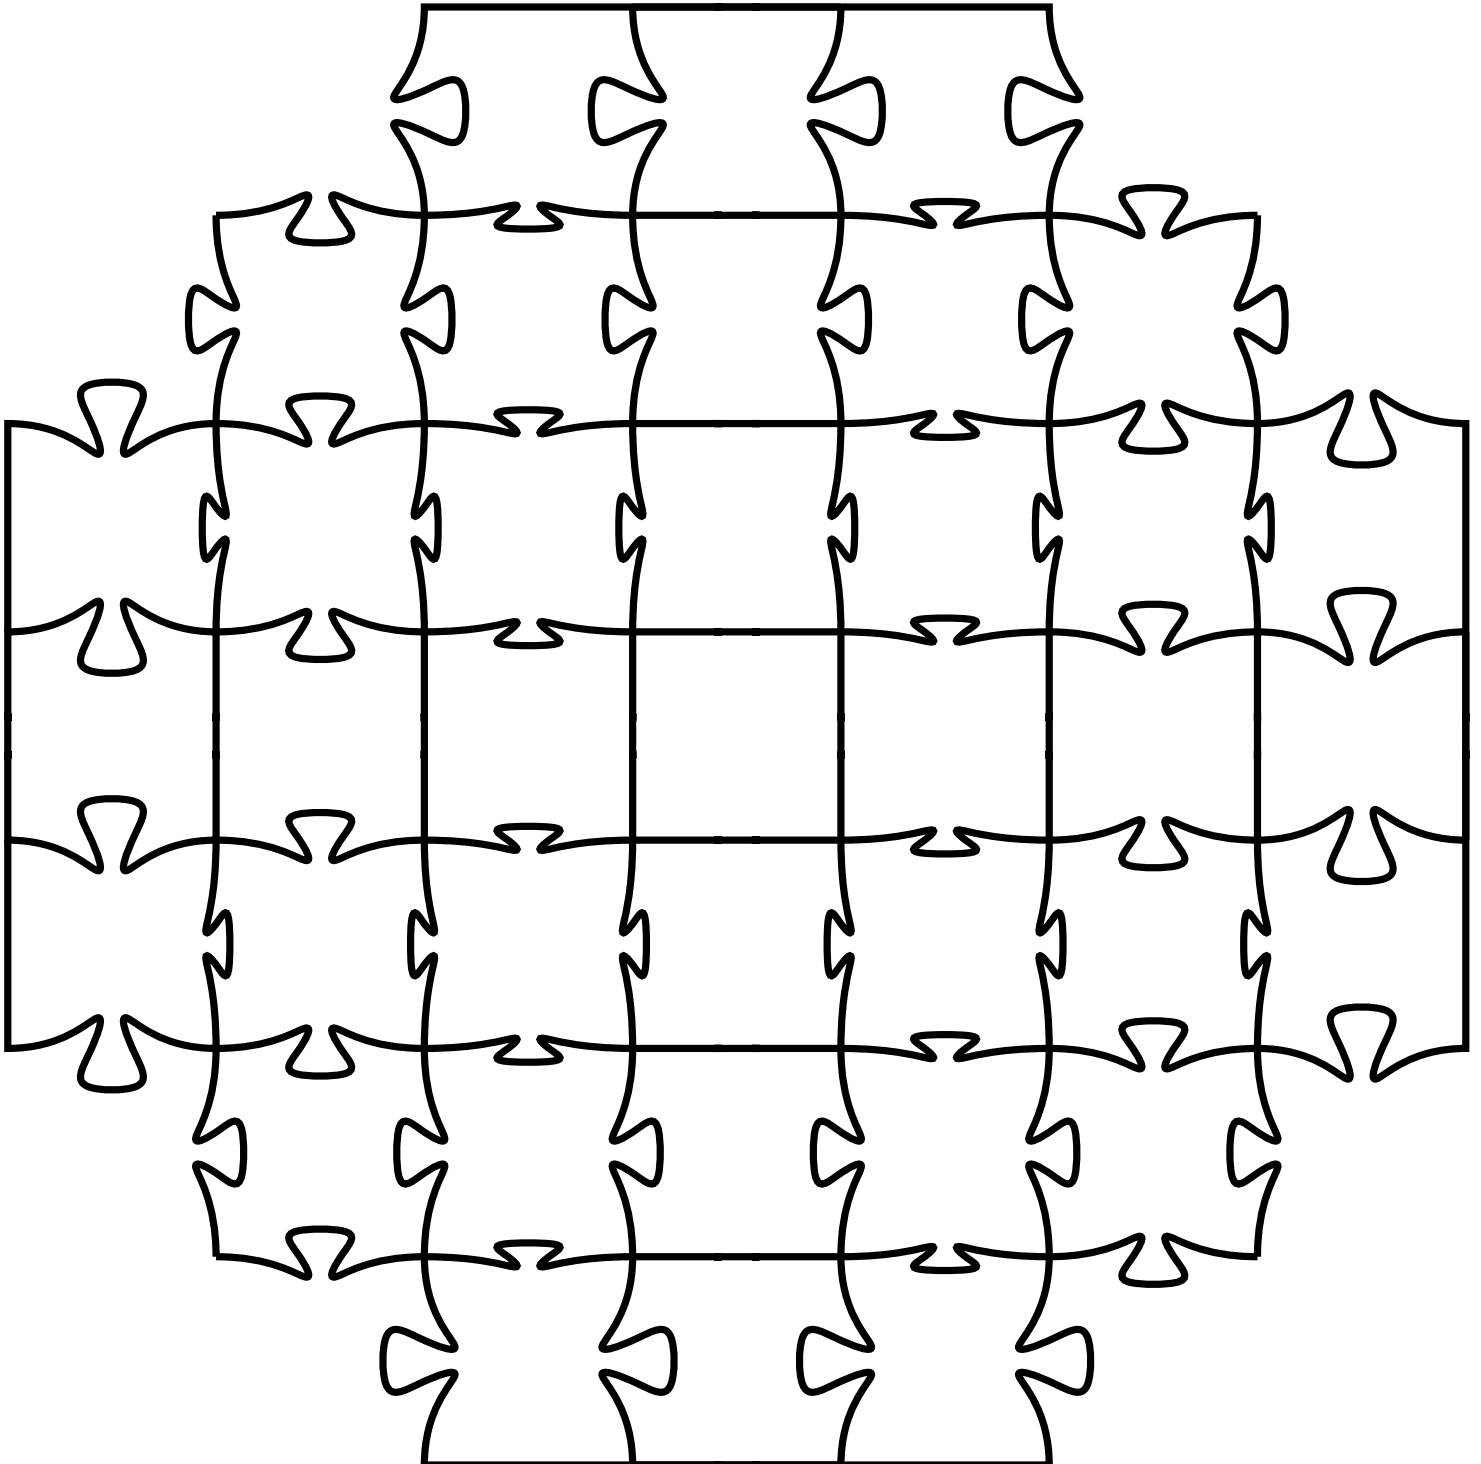

3. Use the pieces with the smallest joints to build a 3x3 square around it...

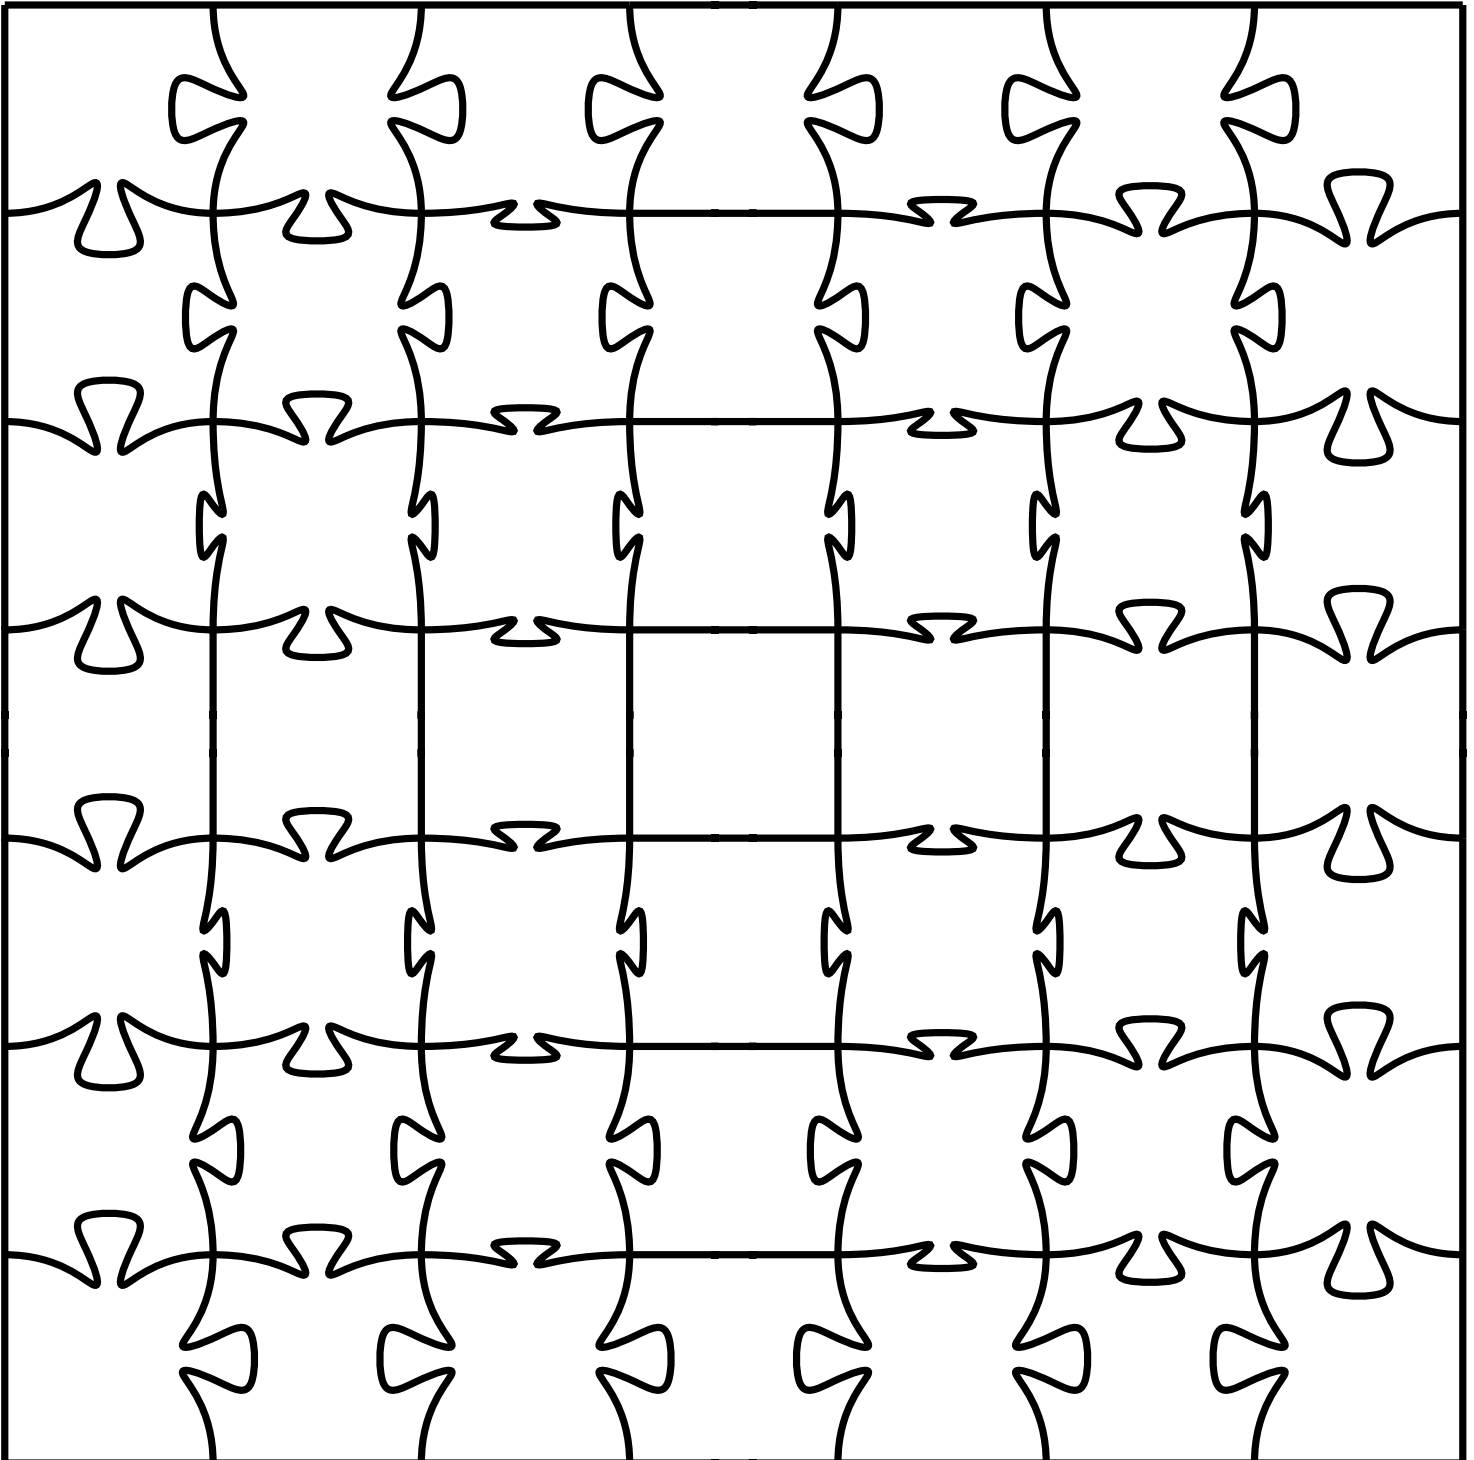

4. Build out the central rows from small to medium to large.

5. Fill in the pieces to approach the corners.

6. Complete the square!

Can you find the secret second solution?
