

# Thank You Card / Gift Card Holder

COURTESY OF

## INSTRUCTIONS:

1. Print the next page (page 2) on your printer. Choose "full size" in your settings so it doesn't shrink or adjust. We suggest printing on heavy paper or cardstock and using the best color quality available in your print settings.
2. Reinsert your paper into your printer so you can print on the back side. Follow printer instructions for which way to place the blank side and where to place the top edge of the paper.
3. Choose your favorite design for the front of the gift card holder (there are 3 available on pages 3, 4 and 5) and print that corresponding page/design on the back side of your paper.
4. Once printed, follow the black lines on the thank you card to cut out design.
5. Fill in thank you card.
6. Fold in 2 side tabs following dotted lines, then fold the bottom up and the rounded top tab down, again following dotted lines. (If printing on cardstock, it can be helpful to score your folds first)
7. Place a gift card inside if desired, and use a sticker or tape to tape the top tab closed so gift card is securedly inside.
