# Simple & Safe Fence Bracing

**BULLET FENCE SYSTEMS**

Ours connectors are made in the **USA with USA steel** and then hot dipped galvanized to last a lifetime.

## Common problems

Rusting & poor quality welds

Rotting

Fire liability

Heat & Fumes

Fire loss

## Design Benefits

- **No weld** - easy and fast install, modification and repair with simple tools quickly. It installs without fire worries and welding quality is never an issue.
- **Adjustable** - adjust or add braces at the height, spacing, angle and number you want. Large choice of sizes and brace configurations.
- **Versatile** - ideal for remote areas where welding equipment is difficult to reach.

## Value

Fence Bullet brace kits cost less, build faster, and installs with simple tools. Installing steel pipe braces with no expensive equipment, extensive labor and skills is a game changer.

- **Strength** - round steel pipe construction is strong and lasts longer than wood. Because you choose the pipe size and thickness you have options. Our steel connectors have been tested without failure at a 4,000 pound pull.
- **Safety** - there is no inhalation of toxic fumes, pacemaker concerns, or eye damage that comes with welding. No hood & leathers for welding protection means less heat stress and no burns installing.
