# “Best fencing product out there!”

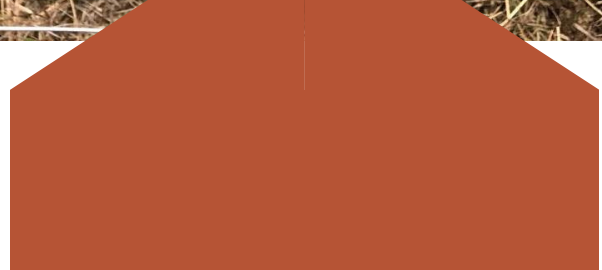

"Where else can you put up a ready to stretch corner H brace, two kickers and a gate attached to it, while wearing a T shirt and listening to the birds sing in eight minutes, without the possibility of a grass fire? Solid, dependable ready to stretch bracing!" - Mike B.

# Solution focused fencing

*A company built on problem solving*

Our founder, faced the struggle of finding a welder, welding between burn bans, and reaching inaccessible areas, He began searching for an alternative to welded fencing in 2015. Since then, Bullet Fence Systems developed the patented Fence Bullet that has solved the issue of building with steel pipe without the need to weld.. We have helped farmers and ranchers across the county get the job done safely. Explore our products at [bulletfence.com](http://bulletfence.com) to find find your personal fencing solution.

## OUR PRODUCTS

### *Brace kits*

We offer kits for H braces, HH braces, HN braces, angle braces, corners and more. Select your post and rail size to get a custom fit using wood or steel posts.

### *Fence Rail Connectors*

Our no weld pipe connector makes light work of building pipe rail fence using either pipe or wood posts..

### *Gate hinges & top rail connectors*

Our clamp on adjustable pipe gate hinges let you hang a gate in a snap and our top rail connectors will give that true top rail look without the in the field coping and welding.

## WHY CHANGE FROM TRADITION

### *Save time & money*

It takes about 5 minutes to install a brace & when compared with welding costs, Fence Bullets are less than half the cost in most cases.

### *No special skills or tools needed*

Our products do not require a welder. No need to hire skilled labor or take your time that could be used to take it easy or build more fence. Install Fence Bullets using only an end wrench.

### *Portable, flexible and Reusable*

Fence Bullets install in remote areas where getting a welder is difficult. Make changes by adding to or removing connectors. Reuse at a new location or make permanent by using tread lock
