

Creating solutions and building awareness for simple and safe fencing

Solution focused fencing

A company built on problem solving

Our founder began searching for an alternative to welded fencing in 2015 after struggling with welded options to complete his fence during a burn ban. Since then, Bullet Fence Systems developed the Fence Bullet (US Patent #10422155 and Canada Patent Pending). We have continued develop new products and in 2021 we partnered with Bekaert to improve retail sales and build product awareness.

Our Products

Brace kits

We offer kits for H braces, HH braces, HN braces, angle braces, corners and more using your round pipe or tube. Select your post and rail size to get a custom fit using wood or steel posts.

Fence rail connectors

Our no weld pipe connector makes light work of building pipe rail fence. We have both a true top rail connector (pipe only) and a line post connector for both pipe and wood posts.

Gate hinges

Our clamp on adjustable pipe gate hinges let you hang a gate in a snap.

Why Change From Tradition

Foundational strength

Tested by Bekaert and thousands of customers to withstand recommended wire tensions

No fire danger

Eliminate the concern for fires and complete your project anytime

Fast & easy install

Installs quickly with no specialized equipment needed

Best fencing product out there!

"Where else can you put up a ready to stretch corner H brace, two kickers and a gate attached to it, while wearing a T shirt and listening to the birds sing in eight minutes, without the possibility of a grass fire? Solid, dependable ready to stretch bracing!" - Mike B.
