

RING SIZING GUIDE

Important first steps to assure an accurate measurement

1. Before printing this ring sizing guide, make sure that page scaling is set to "NONE" in your printer settings (or choose custom 100%, or default settings)
2. Measure the line on the left to ensure it is exactly 2 inches.
3. If the measurement isn't accurate, please review your print settings again. Be sure you are printing full size.

Method 1 - Paper Sizer

1. Carefully cut out the paper sizer below. Be sure to make a small slit in the end for the ruler to slide through.
2. Wrap the sizer around your finger with the numbers facing out and slide the rounded end through the slit.
3. For an accurate measurement, pull the sizer tight over the widest part of your finger. This could be a knuckle.
4. Read the number that lines up next to the slit. This is your ring size.

Tips for accurate measurement

- * Measure your finger later in the day when it is at its largest
- * Avoid measuring your finger when its cold, which are at their smallest.

Method 3 - Use An App

Search for a ring sizing app
We recommend:

IOS: **Ring Sizer (Jason Withers)**
Google Play: **Ring Sizer App**

Method 2 - Measure an Existing Ring

1. Choose a ring that fits the desired finger.
2. Place the ring over the circles below. Match the inside edge of the ring with the closest circle. This is the inside diameter of the ring.
3. If the ring falls between two sizes, select the larger of the two.
