Our Story

THE PID FLOORS DIFFERENCE

For over three decades, PID Floors has earned a reputation as a leader in the hardwood flooring industry, offering extraordinary products—unrivalled in variety and accessibility—and exceptional service.

PID Floors was founded in 1989 by a family from the former Soviet Union, who arrived in the United States with only a sanding machine and a shared dream. Undaunted by a new culture and a new language, they believed that with an unwavering dedication to hard work, love, and exquisite craftsmanship—truly anything is possible.

This ethos is the foundation upon which PID Floors was built and which continues to be our philosophy over 30 years and three generations later. PID Floors remains a family-run company that prides itself on treating each of our clients like an old beloved friend: we are family and so are you. This deeply instilled ethic of authentic personal service combined with the promise of a high-quality product creates an exceptional and trusted quality of experience; this has allowed us to continuously satisfy the needs and tastes of our discerning clients and maintain our position as one of the most respected wood flooring companies in the world.

Our Ideals

WE BELIEVE

That people come before business.

In luxury without elitism.

In style without sacrificing sustainability.

In efficiency combined with friendliness.

In a Bespoke Approach: No client or project is ever the same.

Our relentless dedication to knowledge, expertise, innovation, and ease of service from start to finish, all stems from a deep love for what we do and a true desire to make all of our customers' flooring design dreams become a reality.

ENDLESS POSSIBILITIES

Our mantra at PID Floors has always been "Something For Everyone." We give customers effortless access to the best selection of products from around the world. We consider ourselves a meticulously curated one-stop shop—we carry over 700 standard items in our inventory, most of which are stocked locally for quick delivery. For many years we have traveled the globe, in pursuit of finding the best materials and remain passionately committed to continuously seeking out the best as our industry evolves. Complete with full-bespoke capabilities, we believe in truly "having it all," and making it easily accessible for our customers. This is why we have become a trusted and respected institution for architects, designers, developers, and homeowners.

BEYOND A SHOWROOM

PID Floors has elevated our operation and expanded our influence beyond that of a typical flooring showroom:

- We have developed a first-class logistics network with the capability of shipping to and from locations throughout the globe.
- We own and operate our own local warehouses and distribution centers, complete with fully functional storage, packing, and delivery capabilities. Every step is "in-house."
- We are committed to working with our customers, hand in hand and will be there every step of the way, avoiding the intermediary. From start to finish—from selection to delivery—you will be dealing with us and only us and can expect superior white glove service throughout.

INSIGHTFUL AND EDUCATED STAFF

For three decades, we have focused our efforts solely on hardwood flooring which gives us a unique and exceptional level of expertise. Our staff is comprised of highly trained and knowledgeable flooring experts who guide customers through the PID Floors design process. We are passionate about listening to all our customers' unique and varied needs and delight in collaborating with our clients every step of the way.

- LEED Green Associates
- NWFA Certified Sales Advisors
- Trained Interior Design Experts
- National Wood Flooring Association Certified Inspectors
- American Institute of Architects Instructors
- Hardwood Federation Lobbyists
- Environmental Specialists with specific knowledge about LEED compliance

A BELIEF IN THE BEST, BUT NOT IN ELITISM

At PID Floors we are committed to offering our customers the very best, but we do not believe in elitism. We are a family-owned and run business and pride ourselves in treating each client like a beloved friend: we are family and so are you. We invite you to visit our showroom; feel welcome to bring your children or dog. Take your time browsing; you often will be offered an

espresso or glass of wine. We believe in expertise combined with friendliness.

CUSTOM AND BESPOKE CAPABILITIES

Our team will work with you to create and design your flooring dreams, no matter how big or small, simple or intricate. We create our custom wood flooring locally in our state-of-the-art facility in Brooklyn, New York. There is no combination of color, finish, texture, plank pattern or direction, which cannot be achieved. Our skilled local craftsman also build, by hand, custom designed medallions, inlays, and parquet. If you can dream it, we can make it!

A COMMITMENT TO GIVING BACK

We love New York City; this is our home. We believe in being an active part of our community and in using our business to make a positive impact. It is our privilege to be able to make ongoing donations to amazing organizations such as: American Forests (Corporate Partners), Sustainable Harvest International (Corporate Partners), City Harvest, Central Park Conservancy, NY Cares, New York Landmarks Conservancy, American Forests, Chabad Center for Jewish Discovery, Philip Berley Preschool of the Arts, George To The Rescue.

Our Commitment

TO THE ENVIRONMENT AND TO YOU

Our planet is a sacred place, and we all have a part to play in preserving its integrity for future generations to have the ability to enjoy its bountiful gifts. As a company that's seen as a leader and trendsetter, we feel an even deeper, innate drive to fulfill our potential by providing access to products which pose the smallest detrimental impact to this place we all call our home.

How do we endeavor to accomplish this?

REFLECTION & RESEARCH

By understanding the potential consequences of our actions, we can look at ourselves candidly and determine where improvements can be made. We focus on educating ourselves and using this knowledge to engineer both short-term and long-term strategies aimed at providing our clients with the opportunity to make a small difference.

TRANSPARENCY & COLLABORATION

Even the smallest idea on the smallest scale can blossom into a truly revolutionary paradigm shift. PID Floors continues to work very closely with the experts at the NWFA, the USGBC, and especially the mills and factories. By being open and honest, and driven by the collective desire to do good, we're able to continuously stay ahead of the curve and display products which have the lowest impact on both the environment and on human health.

DEVOTION & DILIGENCE

Our aim is to have PID Floors products meet or exceed industry standards, both present and future. To that end, we emphasize a company-wide focus on making sure we only deal with suppliers that provide us with the best opportunity to display products that:

- Are responsibly harvested
- Come from legal sources
- Are produced using only ethical practices
- Contain no harmful chemicals that pose short- or long-term health risks for people
- Are compliant with all local and federal regulations regarding formaldehyde and Total Volatile Organic Compound (TVOC) content and emissions
- Come from recycled materials whenever possible, and can be reused rather than disposed of
- Are tested to meet the highest standards for safety, integrity, and performance
- Come from local sources whenever possible, as well as NOFMA-certified mills

PARTICIPATION

We are proud to be members or contributors to influential trade organizations:

AMERICAN INSTITUTE OF ARCHITECTS

PID Floors is a proud provider of the American Institute of Architects (AIA) Continuing Education Units.

AMERICAN SOCIETY OF INTERIOR DESIGNERS

We partner with ASID and its members by sharing our knowledge of wood flooring and our selection of products.

FOREST STEWARDSHIP COUNCIL®

PID Floors has Forest Stewardship Council® Chain-of-Custody (FSC-C132261) license from SCS Global Services. Ask about our FSC® Certified material.

MAS CERTIFIED GREEN®

We care about having MAS Certified Green products at PID because we care about the health of our employees and customers. The MAS Certified Green® Program has rigorous product testing requirements to reduce the release of hazardous chemicals. We are committed to diminish the overall impact of Volatile Organic Compounds (VOCs) and with the emission testing completed by our friends at MAS Certified Green, we can certainly achieve our commitment.

U.S. GREEN BUILDING COUNCIL

The USGBC takes creating healthy, highly efficient, and cost-saving green buildings very seriously, and so do we. AS USGBC

members, we are provided with exclusive credentialing opportunities. Many staff members at PID Floors have completed training through the USGBC and have become Leadership in Energy and Environmental Design (LEED) Green Associates.

HARDWOOD FEDERATION

PID Floors works closely with the Hardwood Federation, widely known as "The United Voice of the Hardwood Industry." Our Managing Partner annually travels to Washington, D.C. to speak to the United States Congress about important issues related to the industry.

NATIONAL WOOD FLOORING ASSOCIATION

The National Wood Flooring Association (NWFA) is a non-profit trade organization of the hardwood flooring industry. The NWFA is a pivotal marker of advancements in the industry as it helps to connect professionals from across the country and acts as a driver in setting industry standards. This organization has helped us create a strong business network and establish a robust technical understanding of our profession. The NWFA has had and continues to have a positive influence on our company, and we whole-heartedly support the association.

STANDARDS AND CERTIFICATIONS

PID Floors aims to reduce impacts on human health by eliminating harmful levels of chemicals in our products through the reassurance of meeting standard requirements set by strict indoor air quality certifications. We also have a responsibility to the environment to source our raw materials from well-managed forests.

CDPH STANDARD METHOD V1.2 (2017) SPEC 01350

California Department of Public Health (CDPH) Standard Method v1.2 (2017) is an expanded standard for California Specification 01350, which is used to evaluate building and interior products for low chemical emissions. The CDPH Standard Method v1.2 (2017) is currently the most popular US standard for evaluating and restricting VOC emissions of indoor products.

FLOORSCORE AND GREENGUARD

FloorScore® is a third-party certification developed by the Resilient Floor Covering Institute and Scientific Certification Systems to meet the strict indoor air quality thresholds set forth by the California Section 01350 program. The certification, tests and certifies flooring products in accordance with the volatile organic compound emissions tested with the criteria set forth in the CDPH Standard Method V1.2 (2017). The purpose of the GREENGUARD certification is to promote global sustainability, environmental health, and safety. GREENGUARD sets strict emissions standards based on established VOC chemical exposure criteria.

HEALTH PRODUCT DECLARATIONS

Health Product Declaration® (HPD) Collaborative is a not-for-profit, member association representing the full spectrum of the building industry: architects, designers, building owners, manufacturers, consultants, tool developers, standards programs and others who all share a common purpose to improve the

transparency of information and the material health of the built environment. The HPD Open Standard is a standard specification – composed of a format and instructions for the accurate, reliable, and consistent reporting of product contents and associated health information for products used in the built environment. www.hpd-collaborative.org

FSC® CERTIFICATION

Using wood from responsibly managed forests and tracked by a chain of custody certification is one of the reasons forests in North America are more abundant today than a century ago.

EPA TSCA TITLE VI

The Toxic Substance Control Act has taken the place of the CARB Phase 2 standard for formaldehyde in composite wood products, now enforced as a federal statute in the interest of public health long term.

ENVIRONMENTAL PRODUCT DECLARATION

An Environmental Product Declaration (EPD) is an independently verified and registered document that communicates transparent and comparable information about the life-cycle environmental impact of product. The interest for environmental declarations in building rating systems and certification schemes has increased in the last few years. This may be due to recognition of EPD benefits such as the life cycle approach, the transparent disclosure of relevant impact categories, and the independent verification.

CRADLE TO CRADLE

The Cradle to Cradle Products Innovation Institute administers this life cycle analysis certification to manufacturers and designers to rethink how products are made and what materials the products are made from.

GREEN BUILDING CERTIFICATIONS

LEED

LEED in Energy and Environmental Design, is a green certification program for building design, construction, operations and maintenance. Developed by the U.S. Green Building Council (USGBC), LEED provides a framework to create healthy, highly efficient and cost-saving green buildings, and is the most widely used green building system in the world. LEED regularly undergoes evaluations, whether through clarification of specific credit's language, an adaptation to an existing rating system, or a comprehensive update to its rating systems. The newest version is called LEED v4.1 and it is the most inclusive and transparent platform to date.

THE WELL BUILDING STANDARD™

The WELL Building Standard™ is the leading tool for advancing health and well-being in buildings and communities globally. WELL Certified™ spaces harness the built environment as a vehicle to support human health, well-being, and comfort.

PASSIVE HOUSE

Passive House is a building standard that is truly energy efficient, comfortable and affordable at the same time. This standard is used to design Net-Zero Energy Buildings. One of the requirements of improving efficiency of a building is based off of the airtightness of a building. This standard calls for the airtightness to be a maximum of 0.6 air changes per hour at 50 Pascals pressure (ACH50). Building materials used within tightly built, energy-efficient buildings should not compromise the quality of the indoor air environment and ultimately prevent jeopardizing the health of the building occupants.

LIVING BUILDING CHALLENGE 4.0

The Living Building Challenge (LBC) is a green building certification program and sustainable design framework that visualizes the ideal for the built environment.

PARTNERSHIPS

PARTNERSHIP WITH AMERICAN FORESTS

PID Floors has partnered up with American Forests to plant 5,000 trees across America this year! We invite our friends and partners to donate and work hand in hand with us to combat climate change and to honestly practice sustainable forestry.

A Statement from American Forests:

“American Forests creates healthy and resilient forests, from cities to wilderness, that deliver essential benefits for climate, people, water and wildlife. We advance our mission through forestry innovation, place-based partnerships to plant and restore forests, and movement building.”

PARTNERSHIP WITH SUSTAINABLE HARVEST INTERNATIONAL (SHI)

We will work together to educate farmers in Central America, hinder deforestation, and reverse climate change. PID Floors is passionate about gaining and spreading knowledge, and we could not be more excited to learn and to share sustainable farming techniques.

A Statement from SHI:

“Our proven model equips and empowers low-income farmers with the resources to implement alternatives to slash-and-burn agriculture, sustain the land for future generations of farmers, halt tropical deforestation, and build strong, self-supporting communities through agribusiness.”

Our Portfolio

*Our clients inspire us every day.
We hope to return the favor.*

PID Floors is the destination for those in search of luxury, style, sustainability, and dedicated service. As our client list grows, as well as the number of showrooms open to the public, our reputation for exemplifying the highest standards in product and service speaks for itself, and we are sought out by internationally renowned designers, global brands, and esteemed institutions alike. As we continue to expand, we never lose sight of original values: at our core we are a heart based company.

For The Trade

THE PID FLOORS TRADE PROGRAM

All professional architects, interior designers, developers, installers, and licensed general contractors are encouraged to join our PID Floors Trade Program.

BENEFITS OF THE TRADE

- Exclusive Discounts & Trade Pricing
- Concierge Services including a personally dedicated Trade Account Executive for one-on-one support
- Extended Showroom hours exclusively for Trade Members
- Invitations to Private Events and Free passes to Trade Shows where we exhibit
- Exclusive preview of new products
- Rights to professional photographs of completed spaces (location restrictions may apply)
- Ability to begin Representing The Brand
- Ability to join our Collaborations Corner and create a unique collection personalized for you
- Industry Updates
- Free Custom Flooring Samples
- Free "Lunch & Learns"
- Automatically entered into our yearly raffle

Scan the QR code using your smartphone to apply for trade program.

LUNCH & LEARNS

For over three decades, we have focused our efforts solely on hardwood flooring which gives us a unique & exceptional level of expertise and we love being able to share that knowledge with you. We are proud to offer AIA, NWEA, USGBC | GBCI Continuing Education courses as well as our own PID Floors courses.

We happily offer both in-person and virtual Lunch & Learns and all of our courses are also available online.

PID COURSES: WOOD FLOORS 101

- This PID Floors Course offers general knowledge of wood floors.
- Through this cumulative course, you will gain knowledge on the basics of wood flooring, wood flooring finishes, and the benefits of wood flooring.
- Upon passing the quiz with an 80% or above, you will be awarded a certificate of completion plaque and also will be recognized on our website!

NWEA ARCHITECT AND DESIGN CONTINUING EDUCATION

PID Floors is proud to offer NWEA (National Wood Flooring Association) Continuing Education Courses. NWEA Continuing Education Courses are registered with organizations that provide continuing education credits to professional architects and designers.

These courses are registered with the following organizations:

- The American Institute of Architects
- The Interior Design Continuing Education Council

- American Society of Interior Designers
- Interior Designers of Canada
- International Interior Design Association

AIA CEU COURSE: GREEN WOOD FLOORS

- Overview of green wood floor options.
- What exactly does it mean for floors to be green?
- Understand the importance of green floors.
- Distinguish the differences between adverse health impacts and impacts on the environment.
- Recognize national and international standards.
- Distinguish the varied benefits of solid and engineered wood flooring covers.
- Identifying the environmental attributes of different flooring options.

AIA CEU COURSE: ENGINEERED VS. SOLID WOOD FLOORS

- Learn the advantages of wood flooring.
- General understanding of the differences between engineered and solid wood floors.
- Understand the benefits and limitations of engineered and solid flooring.

- Gain general knowledge of the installation process for both engineered and solid products.
- Learn the maintenance of both engineered and solid wood flooring.

USGBC | GBCI COURSE: GREEN WOOD FLOORS

- Overview of green wood floor options.
- What exactly does it mean for floors to be green?
- Understand the importance of green floors.
- Distinguish the differences between adverse health impacts and impacts on the environment.
- Recognize national and international standards.
- Distinguish the varied benefits of solid and engineered wood flooring covers.
- Identifying the environmental attributes of different flooring options.

For your convenience upon completion of the course, credits earned will be sent automatically to the CES Records for AIA members. We also provide certificates of completion for non-AIA members, which we are happy to provide upon request. We are always expanding and updating our educational programming.

To schedule an in-person or virtual “Lunch and Learn” for any of these courses contact us at: info@pidfloors.com or 212-337-3433. All of our courses are also available on our website www.pidfloors.com for a nominal fee.

Managing Partner Steven Skutelsky presents Ryan Serhant the 2021 PID Design Inspiration Award.

TRADE SHOWS & PID FLOORS DESIGN INSPIRATION AWARDS

TRADE SHOWS

Every year we enjoy taking the opportunity to highlight our collections or launch new products by exhibiting at various trade shows such as the Architectural Digest Design Show, ICFF, BDNY, Greenbuild International Conference and Expo, and more, both locally and nationwide. We are overwhelmed by the talent of our fellow exhibitors at every show we participate in and filled with design inspiration year after year. We always invite our trade clients to join us and offer tickets for complimentary admission.

PID FLOORS DESIGN INSPIRATION AWARDS

The PID Design Inspiration Award is our annual celebration of our tremendously talented clientele and the beautiful spaces that they have created using PID Floors. We never cease to be inspired by what you—our architect, designer, developer, and homeowner clients—create. Photo submissions are accepted year-round.

Past PID Design Inspiration Award winners have included Ryan Serhant, Eleven of Eleven Architecture for Vivvi Early Learning, Chiara de Rege for the NYC Carolina Herrera Flagship store, and many other incredible PID projects.

BDNY

Boutique Design New York (BDNY) is the leading trade fair and conference for hospitality's boutique and lifestyle design community.

ARCHITECTURAL DIGEST DESIGN SHOW

The Architectural Digest Design Show (ADDS) is the essential showcase for luxury design, all in one place.

ICFF

The International Contemporary Furniture Fair (ICFF) is North America's leading platform for contemporary furnishing design.

THE DESIGN DISTRICT SHOWROOM COCKTAIL CRAWL

The Design District Showroom Cocktail Crawl is organized by The Architect's Newspaper and AN Interior annually.

28TH ANNIVERSARY SOIRÉE

Since 1989 we opened proudly as a family-owned and run business. Over 30 years and three generations later, PID Floors remains a family-run company that prides itself in treating each of our clients like an old beloved friend: we are family and so are you. On the 28th anniversary of PID Floors, we threw a party to celebrate and to say thank you to our family of clients these past 28 years; they mean the world to us.

PID FLOORS VIDEO | 30 YEAR ANNIVERSARY

We are so excited to share with you our 30-year anniversary video! For over three decades, PID Floors has been dedicated to hard work, love, and exquisite craftsmanship, and will continue and grow on this path for decades to come!

Scan QR Code to watch our 30 year anniversary video.

REPRESENTING THE BRAND

Since 1989, PID Floors has earned a reputation as a leader in the hardwood flooring industry and has become a trusted institution for architects, designers, developers, and homeowners. By representing and displaying the PID Floors brand in your office or showroom you will be joining an internationally respected company that offers extraordinary hardwood flooring products—unrivaled in variety and accessibility. To begin exploring a Brand Representation opportunity, please contact: info@pidfloors.com

Managing Partner, Steven Skutelsky,
on Capitol Hill in Washington, D.C.

INDUSTRY ACCESS

PID Floors is dedicated to remaining on the forefront of the important issues affecting our industry, our communities, and you. We endeavor to protect, to promote, and to educate in order to make a positive impact within our industry. We are proud to work closely with:

THE HARDWOOD FEDERATION

Since 2015, our Managing Partner Steven Skutelsky has been representing New York State as a lobbyist on behalf of The Hardwood Federation. This includes a yearly trip to Washington, D.C. where Steven meets with U.S. Senators and House Representatives to discuss important legislative matters in the public policy arena impacting the Hardwood Industry.

PID Floors helps support the Hardwood Federation's mission to:

- Promote and represent the common business interests and improve business conditions among members of the hardwood industry
- Maintain a healthy business environment for family businesses and small companies in the hardwood community
- Maintain commercial access to federal and private hardwood timberlands
- Maintain and improve the health of public and private hardwood forests

NATIONAL WOOD FLOORING ASSOCIATION

The NWFA is an internationally recognized and respected touchstone for everything regarding wood flooring. We are proud to be both a trusted information resource for the NWFA as well as an active participant. Our Managing Partner, Steven Skutelsky, is a member of the NWFA Architect & Designer Committee, and is also a Certified National Wood Flooring Inspector and NWFA Certified Sales Advisor.

US GREEN BUILDING COUNCIL MEMBERS

The USGBC takes creating healthy, highly efficient and cost-saving green buildings very seriously, and so do we. As USGBC members, we are provided with exclusive credentialing opportunities. Many staff members at PID have completed trainings through the USGBC and have become Leadership in Energy and Environmental Design (LEED) Green Associates.

Introducing Imagine It...

This simple and innovative online tool allows you to see PID Floors in YOUR space. Visualizing what types, styles, and colors of hardwood floors would realistically look like in your space could not be any easier.

IMAGINE IT
YOUR SPACE. OUR FLOORING.

STEP 1:

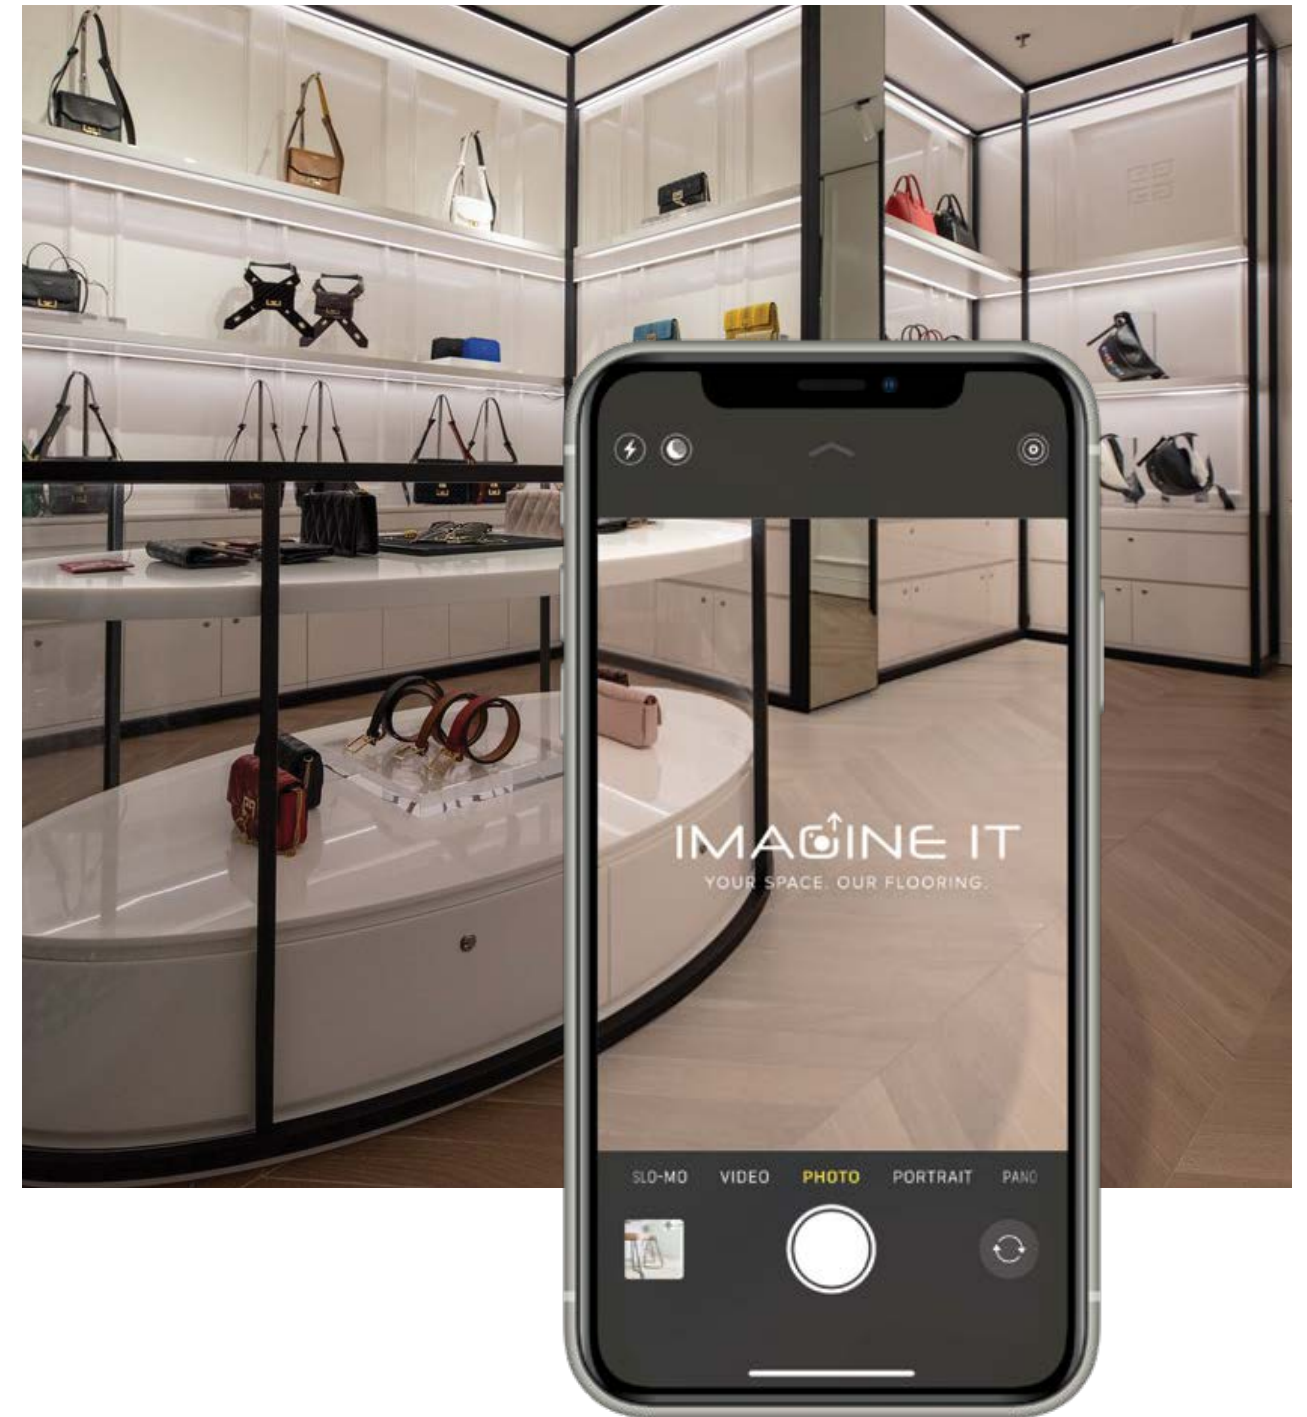

- Take a live photo from your cellphone directly or
- Use a photo from your existing photo library or
- Choose a photo saved on your computer

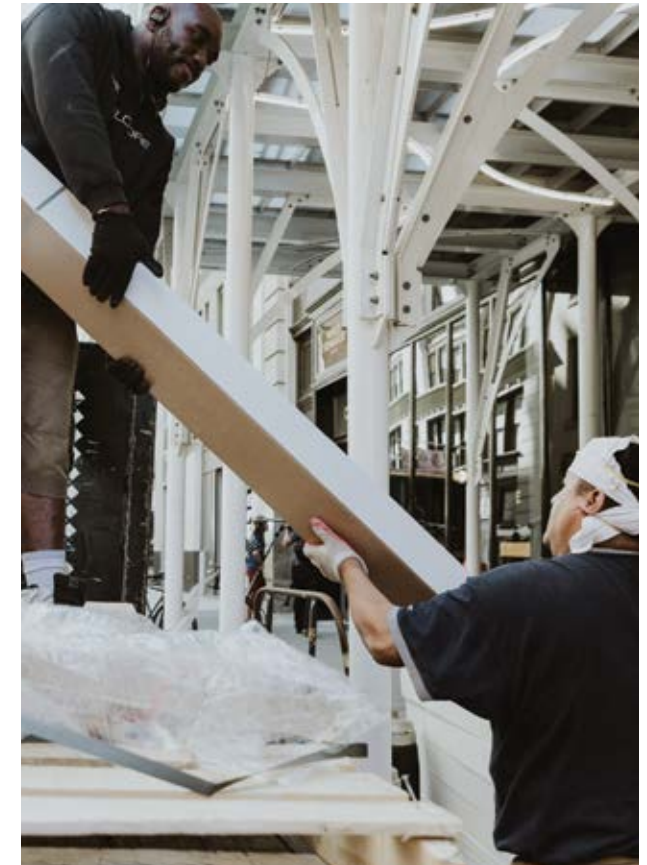

STEP 2:

- Pick and choose any hardwood floors
- Share your choices with others
- Download the images you love

To use the Imagine IT tool, scan the QR code using your smartphone.

PHASE 1: ANCHORING THE DREAM

- Consultation – Our clients meet with one of our flooring account representatives to define their new floor. Covering everything from aesthetics & performance, to budget and lead time.
- Color & Structured Details – Our staff will share their vast knowledge about the many benefits for each type of solid or engineered flooring to best meet your specific need.

PHASE 2: CREATING THE PLAN

- Dimensions & Characteristics – Next, it's time to dive into the details of what will make this floor perfect for you. We discover together what type of species, grade, finish, cut, pattern, and so much more will make this floor truly yours.
- Sustainability – With several LEED Green Associates on staff, we are very conscious of meeting the highest of health and environmental standards. We make sure our priorities are in line with yours and determine the best ways to ensure your custom floor is sustainable for many years to come.

PHASE 3: BUILDING THE FOUNDATION

- Sample Creation – Now it's time to get to work! Our team creates a sample to illustrate exactly what your floor will look and feel like to ensure it is what you had in mind.
- Approval – The sample is now placed in your hands to touch, feel, and see the quality and texture of the floor we are custom creating for you.
- Custom Production – After approval, the team jumps into full production mode to create your flooring

PHASE 4: RECEIVING AND ENJOYING YOUR CREATION

- Logistics: Getting the flooring to the customer via land, sea, or air – No matter where the location, we will deliver your flooring right to your curb for your contractor to take it from there.
- The beautiful floor is installed in the space – Voilà! It's time to enjoy your custom created floor in your beautiful space.
- Lastly, we show you the tools necessary for maintenance so you will have a high-quality floor for many years to come.

angles collection

A Caleb Anderson Collaboration

A CALEB ANDERSON COLLABORATION

This unique and modern collection is American-made with 45° Chevron Cut Rift & Quartered White Oak which has been laid down in a straight Plank Style Pattern. This collection emerged from a mistake-turned-experiment. When we had a leftover box of “all lefts” Chevron, we decided to see what would happen if we laid them together in a plank pattern. We absolutely loved the look and feel of this “accidental” floor and hence the Angles Collection was born! The Angles Collection is a new twist on a timeless style in collaboration with one of New York City’s most incredible design talents, Caleb Anderson.

inLove

COLLECTION

BESPOKE BEAUTY. ENDLESS POSSIBILITIES.

Our inLove Collection offers bespoke services that allow us to create custom flooring locally in Brooklyn, New York. If you can dream it, we can create it, and the possibilities are endless. Any and every aspect of our product can be customized—from the species and grade of wood—to the construction and dimensions of the wood planks. This exciting collection embraces both tradition and innovation, employing time-honored woodworking techniques alongside the most cutting-edge in biochemistry. Art and science meet with the use of reactive color processes: wood smoking (also known as fuming) and reaction-based stains.

INLOVE - ZLATNI COLLECTION

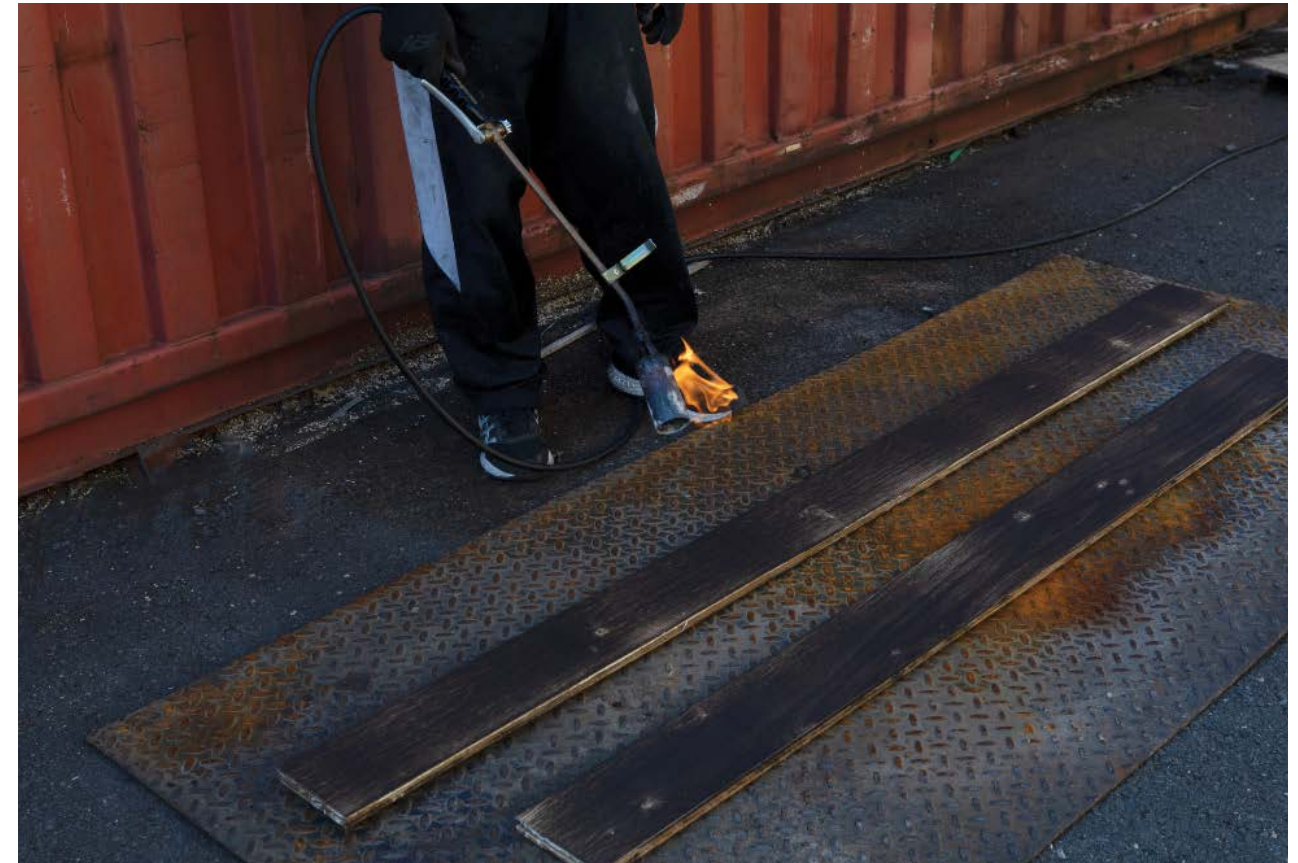

Time-honored woodworking techniques alongside the most cutting-edge in biochemistry.

Done by hand, our reaction staining process uses techniques developed over 300 years ago, before the advent of pigment stains or paints. Flooring stains, made from pigment or dye, saturate the wood with color. This saturation of color often masks or conceals the inherent qualities and unique beauty of the wood. Our natural reaction-based stains and wood smoking processes are quite different because they chemically alter the physical structure of the wood, on a molecular level, to produce a desired color or effect. Our custom colors take about eight steps to produce, replicating the true chemical weathering process that wood experiences in nature. We have the ability to produce a wide variety of beautiful effects and colors. Our finishing process is detailed and meticulous. Each board of wood has its finish carefully applied by hand and will then be air dried separately. Our in-house finishing team is constantly developing new and exciting proprietary finishes.

Scan the QR Code to learn more about the inLove Zlatni Process.

Scan the QR Code to watch videos of inLove Zlatni Floors being made by hand.

INLOVE | SHOU SUGI BAN

Shou sugi ban (烧杉板), the traditional Japanese technique of staining wood by burning, has arrived at PID Floors!

“Shou sugi ban (烧杉板) is the art of preserving and finishing wood using fire. While shou sugi ban (烧杉板) originated in Japan in the 18th century primarily as way to treat cedar siding to make it weatherproof, the technique—which involves charring a wood surface to render it a deep charcoal-black—has caught on recently as a treatment for contemporary exteriors and indoor furnishings alike... The gravitas imparted by the process and finished result (called yakisugi) are undeniable, a blackening of the wood that reveals clean, distinct lines and an inherent textural beauty.” - From: Clever

Scan the QR Codes to watch videos of the Art of Shou Sugi Ban taking place at the PID Floors Distribution Center in Roselle, New Jersey.

CHÊNE

— Collection —

EMBRACING BOTH TRADITION AND SUSTAINABILITY. ILLUMINATING THE NATURAL DETAILS OF WOOD.

Our Chêne Collection showcases the beautiful natural details of wood by employing the traditional Live Sawn Cut. Originating in Europe, Live Sawn, also known as “European Cut” or “French Cut” is one of the earliest and most historic methods of milling. It is also the most sustainable, due to the fact that it utilizes the entire log with very little waste. In Live Sawn wood milling, the entire log is cut straight through in one slice from top to bottom. The resulting long straight cut planks are extremely durable and also especially beautiful because they illuminate the entire life of each individual tree. Every plank reveals the tree’s unique visual attributes such as cathedral graining—due to the tree’s growth rings, mineral streaks, knots, and many other naturally occurring variations. Every floorboard tells a story about the life of a tree.

Well-Treated

COLLECTION

CELEBRATING THE NATURAL BEAUTY OF WOOD.
ECO-FRIENDLY TREATMENTS.
CRAFTSMAN TRADITIONS.

The Well-Treated Collection embraces the craftsman traditions of smoking, fuming, and carbonizing wood. These natural and environmentally-friendly processes involve exposing wood to either heat (carbonizing), ammonia (fuming), or smoke. These treatments react with the tannins, sugars, and minerals found inside wood cells. It is this chemical reaction inside the wood's molecular structure that changes the color of the wood, altering or deepening the color for a desired effect. Visually, these treatment processes preserve the unique look of each piece of wood in stark contrast to the process of staining wood, which can hide many of the beautiful and natural qualities found in wood. Chiseled edges, hand-scraping, distressing, and worn finishes all contribute to the softly rustic, but elegant allure of the craftsman Well-Treated Collection.

To view the complete Well-Treated Collection, scan the QR code using your smartphone.

board COLLECTION

WIDE PLANK. LONG BOARD.

ICONIC BEAUTY. EUROPEAN WHITE OAK.

The Board Collection showcases the singular beauty of Wide Plank, Long Board, Hardwood Flooring. Made from European White Oak, these are truly showcase floors, each plank measuring nine-feet-long and up to nearly 12-inches-wide, providing a powerful aesthetic presence in any space. Utilization of the full log means each hardwood plank will have true character, displaying its full individual beauty. The width and length of these beautiful boards also provide a structural advantage, offering unparalleled balance and stability, to every Board Collection floor.

HISTORICAL BEAUTY.

SUSTAINABLE SOPHISTICATION.

Our Reclaimed Collection is an environmentally friendly gathering of antique reclaimed wood salvaged from dismantled wooden structures found all around the world including 17th and 18th century European Farmhouses, American Barns, and fence posts. This collection is made from 100% pre- or post-consumer recycled material. Every piece of reclaimed wood is truly one-of-a-kind and possesses both historical and sustainable allure.

ARTISANAL ELEGANCE.

TRADITIONAL CRAFTSMANSHIP.

PID Floors is proud to embrace the time-old tradition of creating herringbone and chevron parquet hardwood floors whose origins date back to 16th Century Europe. Our bespoke services offer you the ability to create herringbone or chevron floors according to your exact specifications, desires, and needs. Whether purely traditional or radically modern, we will make your parquet floor however you imagine it, in any of our wonderful finishes.

FINELOCK

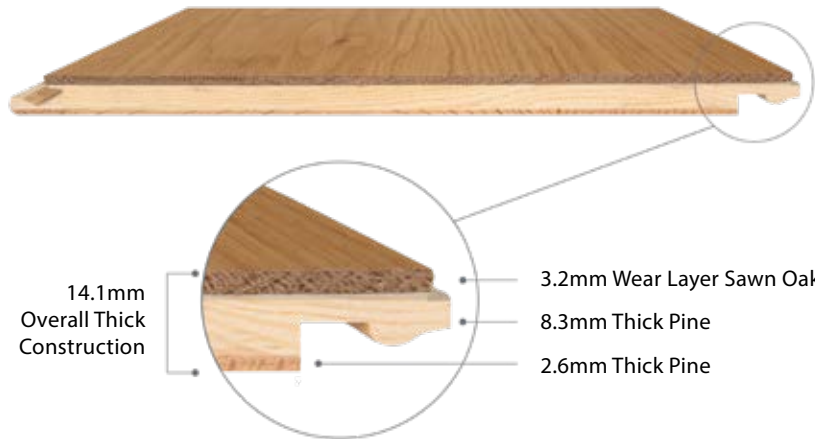

COLLECTION

HIGH QUALITY. PRICE-FRIENDLY.

MODERN LENGTHS. TRADITIONAL COLORS.

The Finelock Collection is focused on offering a high-quality longer length hardwood floor at accessible prices. Made from fine European Oak and Ash which has been cut into long length click-system plank flooring, this collection comes in over thirty classically beautiful tones. The Finelock Collection embraces modernity, tradition, and practicality: longer length floors available in a generous selection of traditional and timeless colors, offered at a friendly price point, and always in stock.

Crave

COLLECTION

NORTH AMERICAN OAK.

DOMESTIC MANUFACTURING.

ULTRA MATTE, CLEAN, AND MODERN.

The Crave Collection supports domestic manufacturing and is sourced, designed, produced, and finished entirely in the United States. Made from North American White Oak which has been grown in responsibly managed forests, this line has been exquisitely milled. It is made complete with an Ultra Matte American-Made Finish. This collection, which comes in ten beautifully versatile colors, is clean, modern, and elegant.

RQ VI COLLECTION

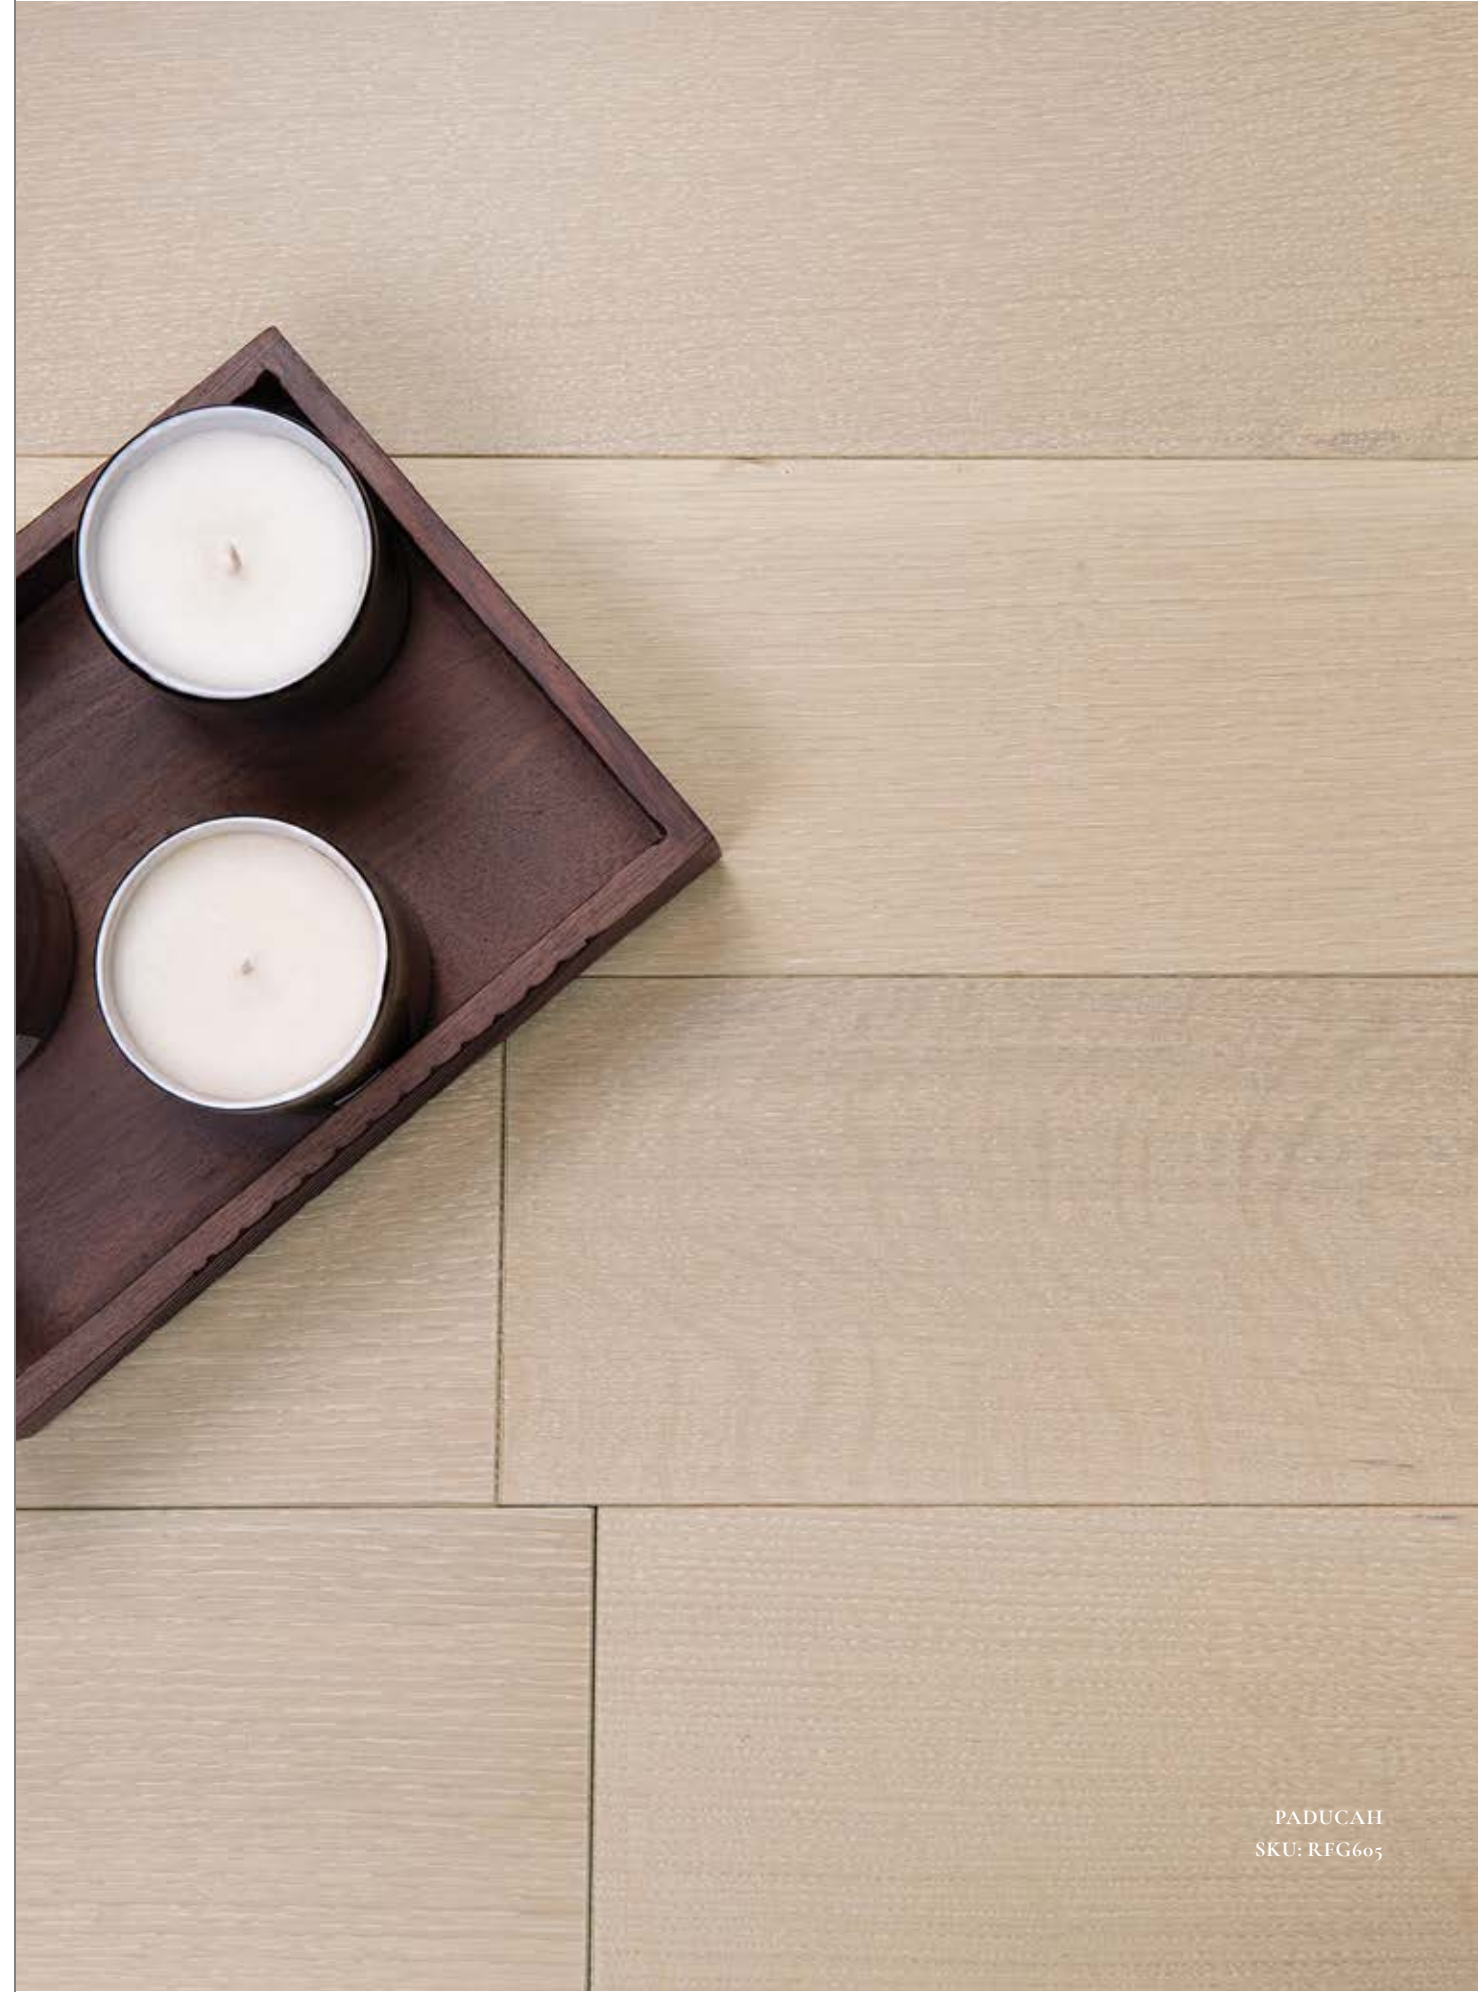

RIFT & QUARTERED AMERICAN OAK. FINEST QUALITY. TIMELESS LUXURY.

The R&Q VI Collection embodies timeless luxury and celebrates the beauty of America's National Tree, the Oak. These beautiful floors are made from Rift & Quarter Sawn White Oak which was domestically sourced from forests in Kentucky and Ohio. Rift & Quarter Sawn is highly regarded for both its straight grain aesthetic and floorboard stability. This collection is further elevated with its six-inch widths and longer lengths. Limited knots and variation of pattern create an elegant minimalist look and feel which is completed with a Smooth Matte American-Made Finish.

ARTISANAL LUXURY.

ENDLESS CREATIVITY.

PID Floors' skilled craftsmen possess the talent, vision, and experience to transform your home into a beautiful work of art. All of our medallions and inlays are custom designed and made by hand. Our craftsmen are masters in both the art of traditional handcrafting parquet techniques and the latest in modern laser-cutting technology, giving you access to the best of both worlds—the old and the new.

To view the complete Parquet Collection, scan the QR code using your smartphone.

Pure

COLLECTION

EUROPEAN OAK. AMERICAN FINISH.

EXCEPTIONALLY SMOOTH.

ULTRA MATTE. UNPARALLELED.

The Pure Collection is the embodiment of sophisticated simplicity. These exquisite Wide Plank Hardwood Floors are made from Pure and Natural Grade European Oak. With small knots and subtle variation of pattern, these floors are given a softly rustic and minimalist canvas which are then completed with an Ultra Matte American Finish. This Ultra Matte Finish is unparalleled—creating the smoothest, softest look and feel. The Pure Collection's smooth surface reminds us of the beauty of a perfectly still lake reflecting the gentle light at dawn.

Selected *Collection*

SELECT & BETTER GRADE.
USUALLY IN STOCK.

The Selected Collection is a thoughtful curation of Oak, Ash, and Walnut Select Grade Hardwood Flooring which has been sourced from all around the world and is kept in stock for quick and easy delivery. Select Grade is one of the highest grades of wood flooring, prized for having a more uniform appearance, softer color variations, and an absence of knots and cracks, while still showcasing the natural beauty and movement of wood.

TANDEM
OAK
COLLECTION

OAK TOP. OAK BOTTOM.

ULTRA-STABLE. ULTRA-BALANCED.

Introducing the NEW Tandem Oak Collection. Uniquely designed with an identical Oak Top and Bottom layer, both of which surround a sturdy Baltic Plywood middle layer, this collection offers an ultra-stable and ultra-balanced three-layer floor. Made from North American White Oak which has been grown in responsibly managed forests, this collection embraces the trend of domestic manufacturing and has been exquisitely designed, produced, milled, and finished entirely in the United States. The Tandem Oak Collection is available for your complete customization.

A FRIENDLY REMINDER FROM PID FLOORS AND THE NWFA

Wood flooring will perform best when the interior environment is controlled to stay within a Relative Humidity range of 30-50% and a Temperature range 60-80° F. During the winter heating season, Relative Humidity levels plummet and extra care must be taken to maintain an adequate environment for your wood flooring to perform optimally, i.e. without failure. Nearly every wood floor will have some seasonal separation between the individual boards – this is normal. However, excessive shrinkage from low RH levels can cause more serious, irreparable issues like cracking, cupping, delamination, and even buckling. This can be prevented by using a humidifier during the cold winter months.
