

General Precautions

- Regular vacuum cleaning or sweeping with a soft broom will reduce the risk of scratches.
- Use a good quality doormat. Dirt is the main cause of wear on wood floors. Placing a doormat outside and inside will help to catch dirt and sand that might otherwise leave scratches in the surface of the wood.
- Put protective felt pads under your furniture to reduce the risk of scratches.
- Lift rather than drag heavy furniture when moving it.
- Any water or other spills should be mopped up immediately to prevent stains and discoloration.

HUMIDITY

Wood is a natural product and reacts to the conditions of the room in which it is installed. Shrinkage or cracking can occur when the humidity is too low. The best condition for a wooden floor is a relative air humidity of between 40% and 65%. Shrinkage may occur when the relative air humidity is lower making the use of a humidifier a requirement. Despite these measures, there is a small chance that gaps, cracks or checks may occur when under floor heating is used especially in the winter, or when the relative air humidity is low.

Wood Cleaner - PTMP001

PTMP001 cleans varnished and oiled wooden floors. PTMP001 is based on polyethylene glycols.

TECHNICAL DATA:

Working temperature: 10 – 25°C (50-77°F)

Storage: away from frost

Packaging: 1 liter

USE:

PTMP001 should be diluted with water.

Depending on the amount of dirt 1:100 to 1:50.

Warm water improves the cleaning result.

INSTRUCTIONS:

Add Wood Cleaner to warm water (100 up to 200 ml to 10 liters). Clean with a damp cloth or mop. Let dry properly.

IMPORTANT:

Do not use too much water when cleaning, excessive water can damage the floor as it causes the wood to swell and expand. For further cleaning instructions check the Wood Cleaner label.
