

# THERE ARE TWO WAYS TO TAKE NEVRBITE FOR THE GREAT OUTDOORS

## PER ADVENTURE (AS NEEDED)

# 4

## HOURS OF PROTECTION IN THE GREAT OUTDOORS

To keep those biting nuisances away on your next outdoor adventure take Nevrbite right before going outdoors. Check out our dosage guide to see how much you need. And remember to swish for 45 seconds!

## FOR PRO IMMUNITY

# 5

## DROPPERS A DAY FOR 5 CONSECUTIVE DAYS

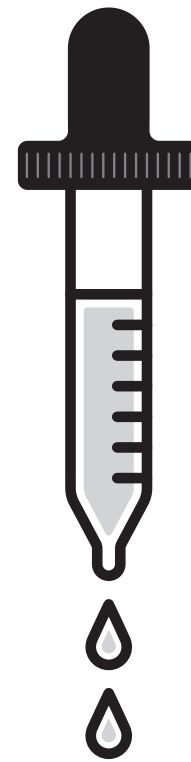

Take 5 droppers for 5 consecutive days to build up your immunity. The following steps will ensure best results:

- 1 Take 5 full droppers in the morning
- 2 Swish for 45 seconds (don't gargle).
- 3 Swallow. Yup, drink it down for complete absorption.

After 5 days Pro Immunity is achieved! Take Nevrbite as needed and each dose will last 8 hours or more. Follow the dosage guide to see how much you need and always remember to swish for 45 seconds each dose. After Pro Immunity is achieved, a dose needs to be taken once a week minimum to maintain results.

PRODUCT IS NOT SUITABLE FOR CHILDREN UNDER THE AGE OF 3

## DOSAGE

- 1 DROPPER  
Up to 30 lbs  
or 13 kg
- 2 DROPPERS  
31 lbs - 90 lbs  
or 14 kg - 41 kg
- 3 DROPPERS  
91 lbs - 170 lbs  
or 42 kg - 77 kg
- 4 DROPPERS  
171 lbs - 225 lbs  
or 78 kg - 102 kg
- 5 DROPPERS  
226 lbs+ or 103 kg+

Dosage is dependent on weight of an individual.

If taking on a continuous daily basis for more than 2 weeks, your body will be requiring a DOSAGE DECREASE. If you were taking 4 droppers, reduce that to 3. As you are getting your immunity system to do more of its protection, naturally.

## SWISH FOR 45 SECONDS BEFORE SWALLOWING
