

Section I

Product Name: 48 Gauge Metallized & Coated Polyester Film
With Heat Seal

Common Name: Metallized Mylar or Metallic Tissue

Chemical Name: Polyethylene Terephthalate Film, Aluminum &
Heat Seal Coated One Side with a Polyurethane
Based Dispersion. Color Coated on Film Side
With a Polyurethane Coating

Section II

INGREDIENTS

COMPONENT	CAS #	% BY WEIGHT	TLV
Polyethylene Terephthalate	25038-59-9	80.5%	Not Listed
Carbon Black	1333-86-4	---	3.5 mg/m ²
Aluminum		---	N/A
*Polyurethane Cross Linked Resin	Proprietary	4-5%	
**Pigment	Proprietary	Less than 1%	Not Established
***Polyurethane Dispersion	Proprietary	14.5%	

*Industrial Coating Resin – Not a Hazardous Material as defined in 29CFR1915-2

**No Heavy Metals as defined in CONEG LEGISLATION

***No Hazardous Ingredients

Section III

PHYSICAL DATA

Boiling Point: N/A

Vapor Pressure: Negligible

Solubility In Water: Insoluble

pH: N/A

Appearance: Silver or Brightly Colored Metallic Plastic Film
