(for setting only)
10:30 PM alarm on

6. How to recharge the battery

- This watch uses a PL352323 USB rechargeable battery.
- If the Battery Indicator Icon ▬ starts blinking, please recharge
  the battery.
- To recharge the battery, gently open the lower side of the sensor cap
  and first connect the USB charging cable to the USB charging jack
  on the watch.
- Connect the charging cable to a power source, e.g. your computer.
- When charging, the Battery Indicator will blink.
- When the Battery Indicator stops blinking, the battery is
  90% charged.
  *It is advised that you continue to charge the battery for a
 full 4 hours to ensure the battery is 100% charged.
  *The alcohol test needs more power than the normal watch functions.
  So if the power is low when starting a test, the Battery Indicator
  may blink to show there is not enough power to complete the test.

Battery indicator

7. How to check alcohol level

The watch can estimate your Blood Alcohol level from a breath sample. (Breathalyser) To perform the test:

- Gently open the upper side of the sensor cap. Please take care not to remove the whole cap.
- Press and hold button C for 3 seconds to start the alcohol test mode.
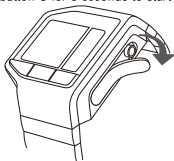

- The alcohol sensor will warm up ready for the test and the display will show a shutter animation.
- After warming up is finished, the display will show a count down to begin blowing.
- The display will then show arrows to indicate you need to blow in the sensor now.
  *sensor-to-mouth distance : 20mm (take care not to spit in the sensor)

Arrows indicate "Blow now"

Blow into the sensor
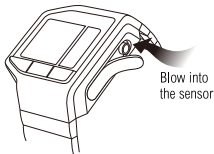

- Continue blowing until the arrows stop animating (about 5 seconds)
- For best results, take a break from drinking alcohol before taking the test. Alcohol in your mouth will give a false score.
- Test results are shown in the right side window on the watch display.
