THE WEEKEND

Whilst the weekends are yours to enjoy, we recommend that you continue to eat 2250 calories a day. It is also important to remain mindful of what you're eating: listen to your body, stop when you're full, consider where your food comes from and eat nutritionally.

Avoid eating processed foods and additives which can make you feel sluggish, gassy and bloated. Instead, embrace whole grains, vegetables, fruits and lean protein to continue feeling fabulous over the weekend! We promise it will all be worth it.
