## Installation instructions:

- a. Unscrew the thumbscrew counterclockwise to remove the small bracket
- b. Hold the small bracket in place behind the trailer's standard license plate bracket
- c. The bent tab on the small bracket should be at the top and face toward the front of the trailer
- d. Line up the small bracket's holes with the holes on the trailer's standard license plate bracket
- e. Optional: use thread locker on the screws during installation
- f. Screw the small bracket in place using two button head screws and two lock washers

- g. Hold the SOLPH in place behind the trailer's standard license plate bracket with the left side small spring ends toward you, sandwiching the standard license plate bracket (the SOLPH will be in the open position while you install it)
- h. Line up the mounting bracket's holes with the holes on the trailer's standard license plate bracket
- i. Optional: use thread locker on the screws during installation
- j. Screw the small bracket in place using two button head screws and two lock washers

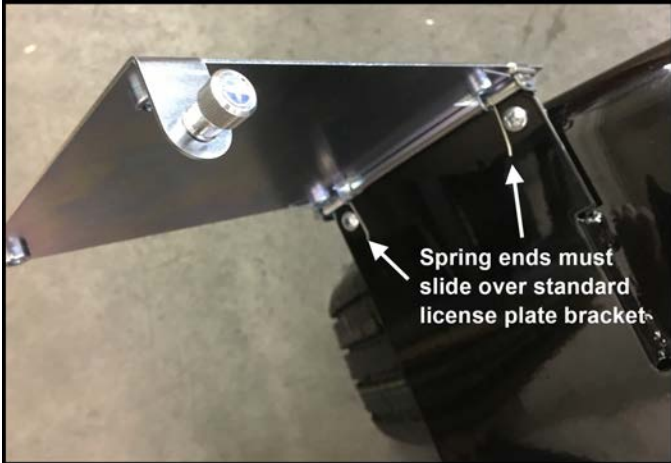

Photo: SOLPH placed on trailer with spring ends slid over bracket

- k. Firmly tighten all screws; do not over tighten
- l. Close the SOLPH
- m. Align the thumbscrew with the hole in the bent tab on the small bracket
- n. Tighten the thumbscrew to secure the SOLPH closed

Photo: Tighten the thumbscrew on the closed SOLPH

- o. Install your trailer's license plate on the SOLPH using four button head screws
- p. Your SOLPH and license plate is now installed
- q. Go. Ride.
