ScaperLine – quality for artistic freedom

In aquascaping, the beauty of nature serves as the basis and the inspiration. There are virtually no limits to your imagination. Passion and creativity come together to set the tone. Every little detail is given the same level of dedication as the overall result.

High-quality materials are just as important to the aquascaping philosophy as being able to enjoy your own design for a long time after it's complete.

OASE ScaperLine products will help you create artistic landscapes that dreams are made of, and avant-garde water gardens you'll never want to leave. We are passionate about helping aquascapers and aquarists bring their most creative design ideas to life, and we channel our passion for perfection into every product we offer, right down to the last detail.

THE DETAILS PERFECT THE ARTWORK

In aquascaping, every detail counts – the shapes and shades of the stones, the intensity and colours of the plants, or even the position of all the elements in the aquarium.

Perfection in every detail

Made by professionals for professionals, the innovative OASE ScaperLine range of products perfectly combines elegance and functionality. Together, the aquarium and the cabinet fit together seamlessly for a modern design aesthetic that fits into practically any living space.

For a pure and natural look – ScaperLine aquariums

CLEAN VIEW AND SECURE HOLD

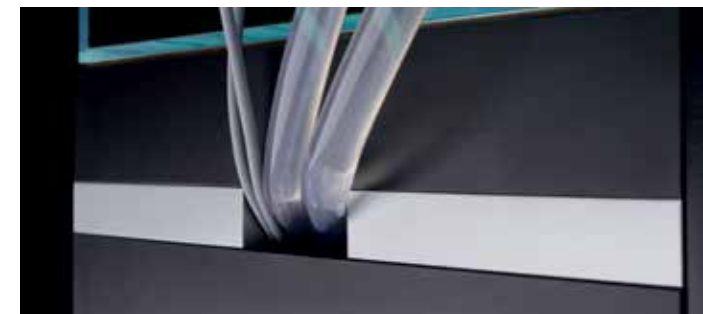

ScaperLine aquariums are made from Optiwhite glass, providing a clear view of your underwater world. The aquarium also has mitered corner seams and chamfered edges with durable clear silicon for an exciting, stand-out design.

Simple, clean exterior and clever internal features - ScaperLine cabinets

PRACTICAL DETAILS – NO CONFLICT BETWEEN FUNCTION AND DESIGN

Push-to-open cabinet locks for a seamless aesthetic and user convenience - a quick press is all it takes to open the door. The doors also have a safety feature that prevents them from being slammed closed.

NO TANGLED CABLES OR HOSES

The inconspicuous cable feedthrough, on the side wall of the cabinet, provides cable and tubing management. This can be sealed if required.

CLEVER FEATURES – OPTIMAL USE OF STORAGE SPACE

Neodymium magnets are integrated inside the cabinet door to ensure safe storage and easy access to aquascaping tools. A towel holder and pull-out shelf are also integrated into the cabinet.

EASY INSTALLATION

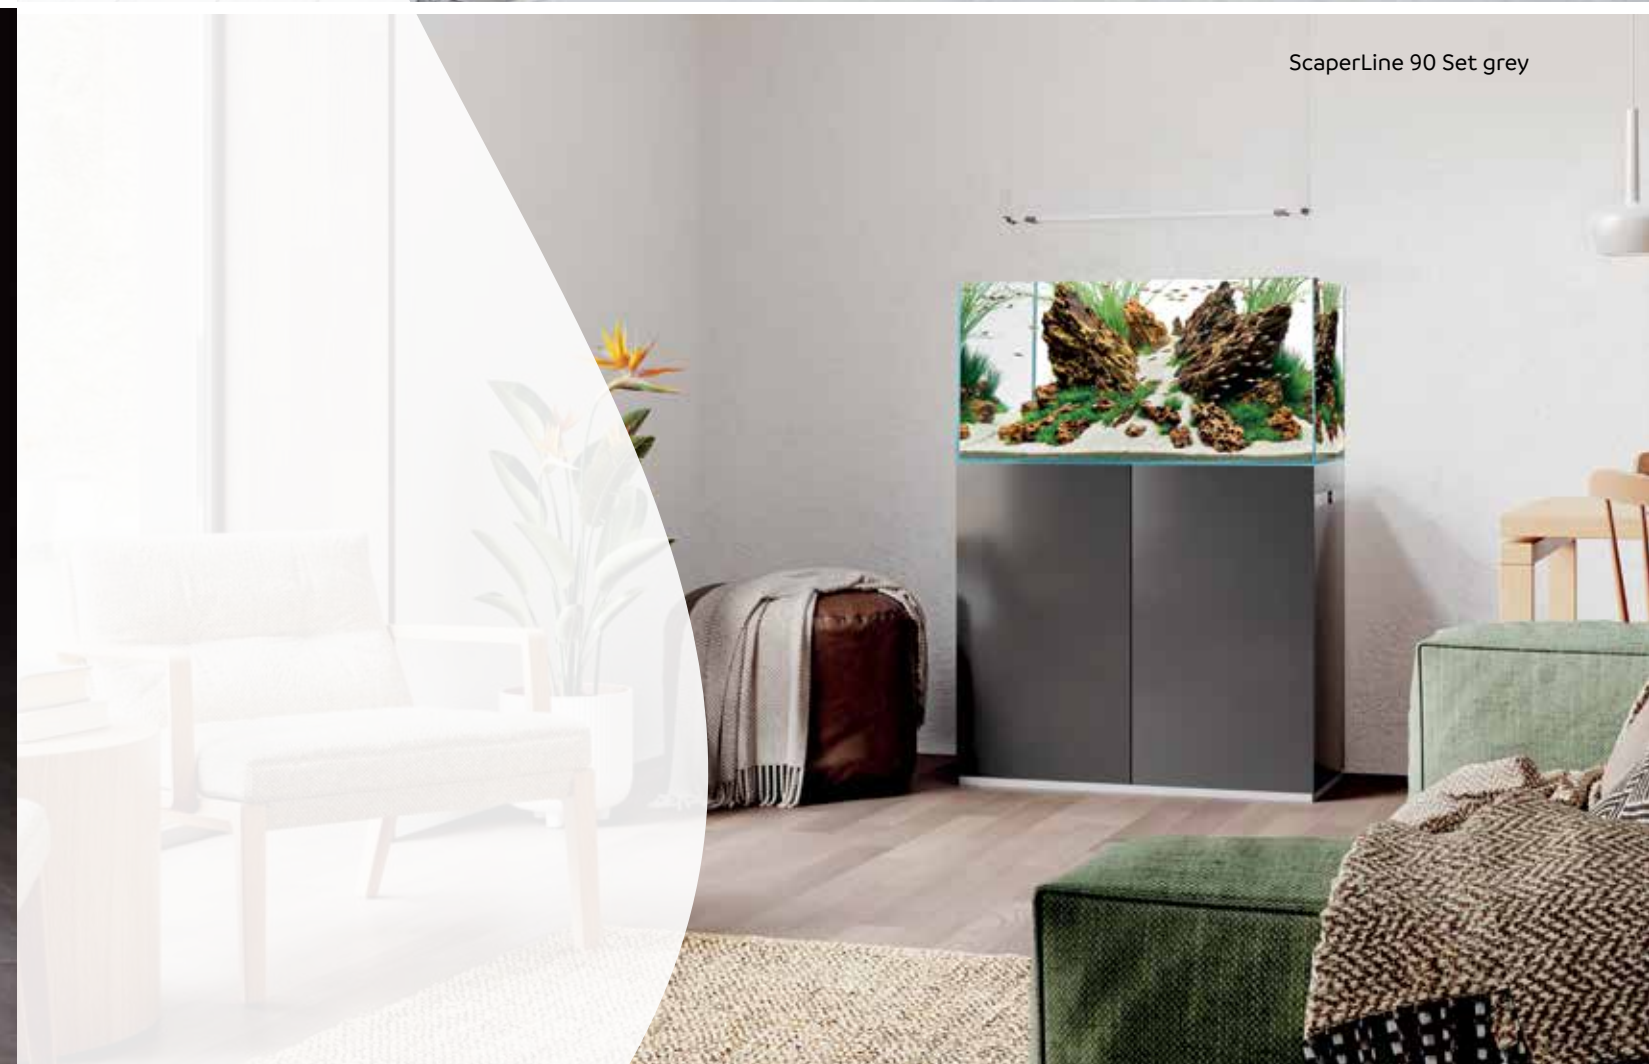

The cabinet is equipped with leveling feet that can be easily adjusted before and after your aquarium is set-up on the cabinet.

ALL-AROUND AESTHETICS – OPTIONAL BACK WALL

A panel can be attached to allow the ScaperLine set to be used as a room divider. This panel covers the back of the cabinet, opening up completely new design opportunities.

ScaperLine soil

Active substrates for planted aquariums. Using this soil as a base in your aquascape will facilitate the best possible plant growth. ScaperLine Soil makes the water softer and creates a slightly acidic pH range that is favorable for many aquarium plants. Active soil can absorb nutrients from the water and release them again when needed - the buffer effect is ideal for sustained good plant growth. The 2-4 mm grain size of our ScaperLine Soil is perfect for all aquascapes, and provides good support for the plant root. You do not need to wash the active soil before using it in your aquascape. Simply pour the soil into the aquarium dry and adjust as needed. The soil will not make the water cloudy.

TOP 3 PROPERTIES

- Softens the water and lowers the pH
- Acts as a nutrient buffer for lasting healthy plant growth
- Promotes rooting in the scape
