

# L I G H T S C A L E

## 1. WHAT IS IT?

- Professional decolorant, **non** volatile, in white **powder**.
- **Low** ammonia content.
- **Pleasant** perfume
- **Superior** hydrating power

## PROFESSIONAL DECOLORANT

- Light Scale Up to 9 is the new professional decolorant in **white powder** which allows you to read the lightened tones achieved more easily.
- Compact, non volatile powder. Easier to prepare.

## LOW AMMONIA CONTENT.

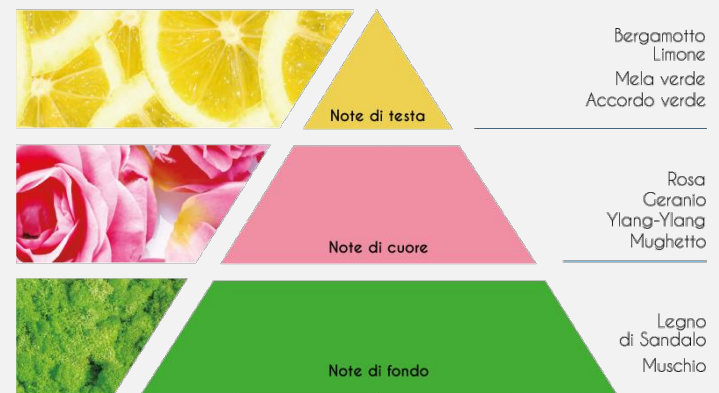

Delicate for both the customer and stylist.

The low ammonia content means low emissions resulting in maximum comfort throughout the lightening service.

# FRESH, EFFERVESCENT PERFUME

*The sparkling notes of lemon and green apple  
blended with a rich floral bouquet of  
rose, ylang ylang and lily of the valley.  
Enveloped in a sweet undertone  
of musk.*

Amino Sugar Care Complex  
Lightenex-Pro Complex + Cysteine and Glycine

## SUPERIOR HYDRATING POWER

**Lightenex-pro complex** is the innovative complex of amino acids and sugars.

The amino acids penetrate **deep down in the hair structure**, softening the effect of the persulphates and preserving the damaged keratin structure.

The **sugars**, however, **work on the surface of the cuticle, providing moisture and nutrients.**

## SUPERIOR HYDRATING POWER

**Cysteine and Glycine** work within the keratin bonds and the hair structure, strengthening and boosting the lightening process **for a result that provides greater care for hair.**

**Cysteine and Glycine** open like amino acids and release more oxygen, boosting the lightening process.

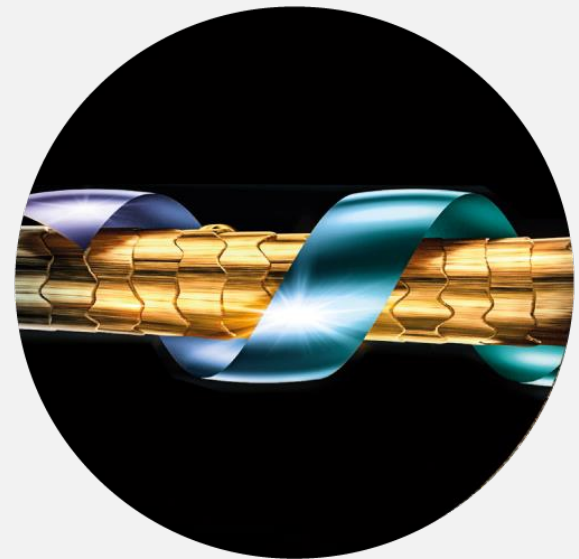

## SUPERIOR HYDRATING POWER

As a result, hair is:

- Protected
- Restructured
- Strengthened
- Decolored completely and safely.

In line with Lisaplex™

# FAST ACTING

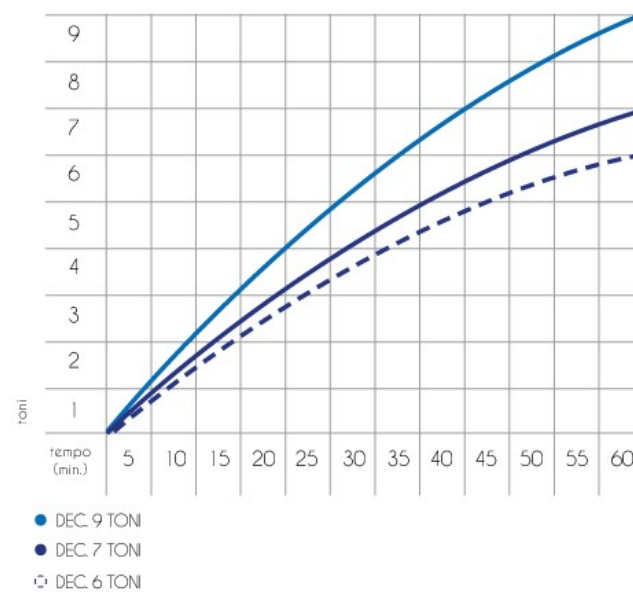

Light scale up to 9 acts faster than most decolorants on the market.

Example of lightening by 4 shades

Starting base: 4 (Brown) natural

Goal: 8 (Light Blonde)
