# Solo

## Smoothing Treatment

### Step 1: Prep the hair

Cleanse the hair thoroughly using our hydrating daily shampoo. Avoid scrubbing or manipulating the scalp. DO NOT apply conditioner.

### Step 2: Hand dry

Towel Dry thoroughly to ensure excess moisture is removed. Section into six panels and secure each panel with a clip.

## Smoothing Treatment

### Step 3: Application

Hold an entire panel beginning at the nape.

Apply the keratin solution at the base of the panel using firm, single brush strokes.

Repeat on all four sides of the panel.

**DO NOT** apply solution to the scalp at any time.

## Smoothing Treatment

### Step 4: Separate hair

Separate the panel in half and apply the keratin solution to the upper and lower parts of the section.

### Step 5: Fine tooth comb

Use a fine tooth comb to comb through the entire panel, from the base through the ends making sure the whole length is covered by the product.

Add more solution if needed. Repeat steps 3-5 on the remaining panels.

## Smoothing Treatment

### Step 6: Section

Clip each panel away from contact with the skin. Processing time varies from 20-60 minutes. Refer to processing chart.

Strand test on a few strands of the hair. If the hair stretches and gives you some pull, then rinse.

### Step 7: Rinse

Rinse thoroughly with WARM water; if the hair is over processed or colored, shampoo lightly with our hydrating daily shampoo.

### Step 8: Condition

Follow with our Hydrating Daily Conditioner. Massage into wet hair and leave on for 2 minutes; rinse thoroughly. (You may apply a demi or semi permanent color to refresh the color after the conditioner if needed).

### Step 9: Blow Dry

Blow dry the hair 100% dry using high heat and a round brush. Use tension on the hair to create the perfect blow-out.

## Smoothing Treatment

### Step 10: Blow dry & finish

Section hair and iron using the proper temperature according to the chart.

Take 1/8' sections for sleeker and straighter hair.

Press tightly with an iron for fine seconds on the base/resistant area, and then slowly smooth over the entire section 5 to 7 times.

**NOTE:** the thinner the section, the straighter the hair becomes. The thicker the section, the hair will remain in the same curl pattern but will be frizz free, smooth and shiny. Refer to the temperature chart.
