

GDS® Desktop Dock with Power Delivery

This single GDS® Desktop Dock with Power Delivery is a low-profile docking and charging station for phones and small tablets wrapped in an IntelliSkin® protective sleeve. The desktop dock provides power connectivity only and is designed for everyday use of most tablets and phones. The desktop dock features pogo pin contacts designed to match the pogo pads on IntelliSkin®-wrapped devices supporting USB Type-C charging profiles. The USB Type-C charging cable is integrated into the back of the dock with a power output of 20V @3A max. This dock will support all devices wrapped in both IntelliSkin® and IntelliSkin® Nex Gen devices.

Compatible Devices:
IntelliSkin®-wrapped phones

RAM-GDS-DOCK-D7U
