

Next Gen IntelliSkin® for Samsung Tab Active Pro

The IntelliSkin® Next Generation protective sleeve for the Samsung Tab Active Pro features several enhancements to the original IntelliSkin®. First, an insert molded redesign of the skin combines a hard plastic shell with soft, shock-absorbing rubber. Second, ruggedized contacts for repetitive docking in field applications remain on the exterior, but are now flat to collect less dirt and allow for easier cleaning. And third, an integrated USB Type-C connector at the bottom of the skin allows for device charging when a GDS® Dock™ is unavailable. Each sleeve still provides military-grade drop protection and prevents damage to device charging ports from constant docking with an integrated GDS® connector.

IntelliSkin® Next Generation for the Samsung Tab Active Pro includes a slot for the Samsung stylus and is compatible with a variety of GDS® Docks™ and accessories, as well as new docking cups for upgrading existing GDS® vehicle docks.

Compatible Devices:
Samsung Tab Active Pro

RAM-GDS-SKIN-SAM54-NG
