

RAM® ATV/UTV UNIVERSAL HANDHELD MOUNT

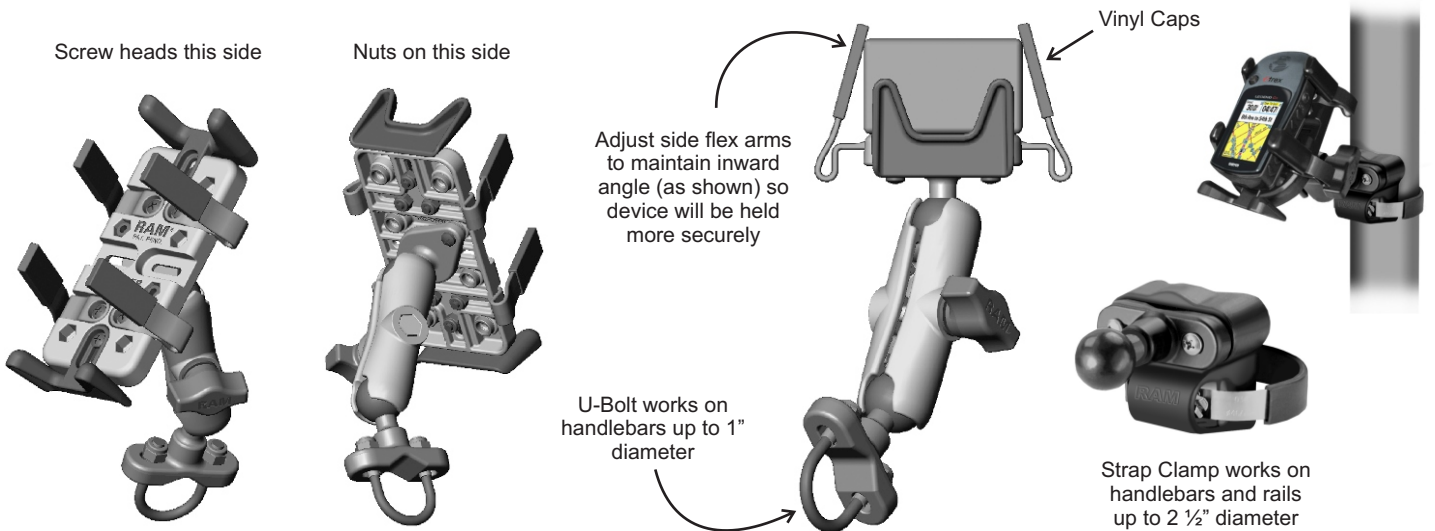

The RAM ATV / UTV Universal Hand Held Mount will fit most any popular GPS, Radio, Cell Phone or many other hand held devices. The important part to get maximum benefits of this design is to use and adjust the proper size of flex side arms (4 qty. of 3 sizes are supplied). When your device is secured in the holder with the properly sized and adjusted flex side arms they will be flexed. They will have an inward angle to them so the device won't release without firm release pressure. Some experimenting is recommended to find the proper spring tension for your particular use and size of device. For handlebars or tubes up to 1" dia. use the U-Bolt and for sizes larger than 1" use the strap clamp assembly as shown above.
