

RAM EZ-STRAP™ ASSEMBLY GUIDE

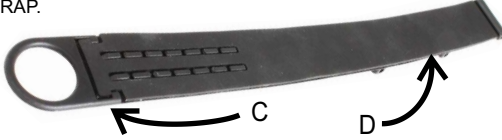

PARTS INDEX:

- A. 1-QTY. EZ-STRAP™ BASE
- B. 1-QTY. RUBBER O-RING (PRE-INSERTED IN BASE)
- C. 1-QTY. RAM EZ-STRAP™ ADJUSTABLE STRAP
- D. 1-QTY. ADHESIVE PAD FOR ADJUSTABLE STRAP
- E. 1-QTY. ADHESIVE PAD FOR EZ-STRAP™ BASE
- F. 1-QTY. STAINLESS STEEL PIN INSERT

TOOLS NEEDED:

- SCISSORS
- PLIERS
- SCREWDRIVER

- ATTACH (D) ADHESIVE RUBBER PAD TO (C) STRAP. SLOTS IN ADHESIVE PAD MUST FIT OVER BUMPS ON STRAP.

- CUT OUT MEASURING STRIP SHOWN ON LEFT. WRAP STRIP AROUND AREA WHERE STRAP CLAMP IS TO BE ATTACHED. ALIGN "START HERE" LINE WITH COMPATIBLE SEGMENT TO DETERMINE APPROPRIATE STRAP LENGTH. ONCE CORRECT SEGMENT IS DETERMINED, CUT **ONLY** ALONG ONE OF THE SHOWN REFERENCE LINES USING SCISSORS.

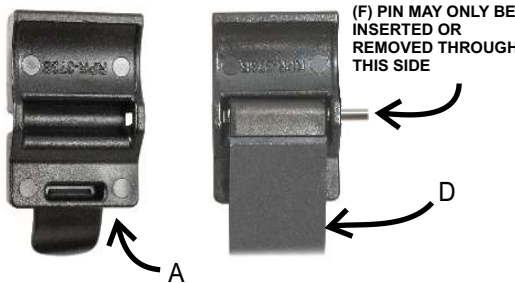

TRIM ANY EXCESS PLASTIC BEHIND STRAP HINGE.

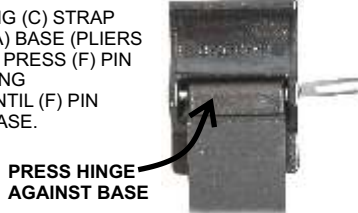

- WITH (D) ADHESIVE PAD FACE UP, INSERT (F) PIN INSIDE HINGE OF (C) STRAP. PIN MUST PROTRUDE FROM **RIGHT SIDE** OF HINGE AS SHOWN.

- POSITION (A) BASE AS SHOWN, INSERT (C) STRAP AND (F) PIN INSIDE PIN HOLE OF (A) BASE, POSITIONING (F) PIN INSIDE **RIGHT SLOT** OF BASE.

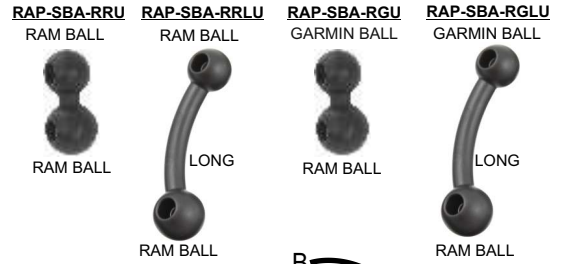

- WHILE PRESSING (C) STRAP HINGE AGAINST (A) BASE (PLIERS MAY BE NEEDED), PRESS (F) PIN INSIDE HINGE USING SCREWDRIVER UNTIL (F) PIN SNAPS INTO (A) BASE.

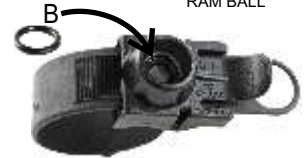

- ADHERE (E) ADHESIVE PAD TO BOTTOM OF (A) EZ-STRAP™ BASE (OVER "RPR-373B" TEXT).

- ATTACH SNAP-LINK PORTION OF MOUNT TO (A) EZ-STRAP™ BASE. SNAP LINK COMPONENTS MAY VARY BASED ON PRODUCT PURCHASED.

VERIFY THAT (B) RUBBER O-RING IS PROPERLY INSERTED IN (A) BASE PRIOR TO INSTALLATION.

PROPER EZ-STRAP™ ADJUSTMENT

TO TIGHTEN EZ-STRAP™

PLACE EZ-STRAP™ ON SURFACE. FEED STRAP THROUGH (A) BASE UNTIL STRAP CLICKS IN BASE. WHILE PRESSING EZ-STRAP™ BASE AGAINST SURFACE, PULL STRAP BACK WITH FOREFINGER UNTIL TIGHT.

TO LOOSEN/REMOVE EZ-STRAP™

PULL RELEASE LEVER TOWARD SNAP-LINK MOUNT WITH THUMB. FEED STRAP FORWARD TO LOOSEN AND/OR REMOVE.

REPLACING STRAP FROM BASE

FOLLOW THIS STEP IF YOU NEED TO REPLACE YOUR CURRENT STRAP WITH A LONGER OR SHORTER STRAP.

FOLLOW **STEPS 5 AND 4** ON REVERSE SIDE. USE SCREWDRIVER ON **OPPOSITE** SIDE OF BASE TO PRESS (F) PIN OUT THE SAME SIDE IT WAS INSERTED.

WHEN (F) PIN PROTRUDES FROM **RIGHT SIDE** OF BASE, WEDGE HINGE OF (C) STRAP OUT OF BASE TO REMOVE.
