VENT MOUNT
INSTRUCTIONS

WHAT'S IN THE BOX
requires Peak Design Case
not included

ARE MY VENTS SUITABLE?
For the Vent Mount to perform optimally, your vehicle must be equipped with the correct style of vents:

• Straight blades that are 7-23mm (1/4-7/8") deep.
• Secure, not easily-removable blades.
• Minimum 8mm (5/16") gap between blades.
• Minimum 63mm (2 1/2") vent body width for vents with vertical blades.
• Minimum 63mm (2 1/2") vent body height for vents with horizontal blades.

These work:

These do not:
**INSTALLATION**

**NOTE:** In general, HVAC vents are not designed with accessory mounting in mind. As such, exercise caution during installation.

1. Loosen **Swivel Knob** ½ turn and rotate **Swivel Arm** so it is aligned with the **Mount Body**. Note that this may require some force to initially move **Swivel Arm**.

2. Fully Extend the **Blade Hook** by turning the **Hook Knob**.

   **WARNING:** Do not over-expend the Blade Hook, this can damage the mount! Stop at the warning!

3. Adjust your car’s vent to a fully open position.

4. Align the **Blade Hook** just above the blade on which you plan to attach. Align the **Blade Clip** 1-2 blades down from the **Hook**. Ideal position is car/vent dependent.

5. Insert both **Blade Hook** and **Blade Clip** fully into the vent.

6. Drop the **Hook** over the vent blade and secure it by rotating the **Hook Knob**.

   **WARNING:** Do not overtighten the Hook Knob, this can damage the vent!

7. Loosen **Swivel Knob**, adjust the **Swivel Arm** to desired position then secure it by retightening the **Swivel Knob**.

**USE**

**Wireless Charging Car Vent Mount** magnetically connects to the back of your phone. Requires **Peak Design Everyday Case** or MagSafe Phone/Case.

**WARNINGS**

**WARNING:** A phone mounted on vent may overheat when heat is on.

**Vent Mount** may prevent vent from articulating fully.

If not attached correctly, product and/or phone may dislodge or be thrown into air in event of crash. Consult your car’s manual to ensure mount does not cover or interfere with operation of airbag.

**Stay safe.** Follow local regulations for phone use while driving.
