

How To Assemble Your Adjustable Device Mount

The Adjustable Device Mount allows you to rotate, tilt and swivel your device. Loosen the collar to adjust, then tighten to lock into place.

1. Thread the B17 ball into the flexible gooseneck arm.
OPTIONAL: gently tighten the set screw if installed on the gooseneck end adapter.

2. Slide the plastic collar over the B17 ball

3. Insert the ball into the socket on the back of the Adjustable Device Mount and tighten the collar
