

HEADS UP!

What's this "band" wrapped around my bully stick?
It's **100% beef intestine** that has been tightly wound up into a tight strand. It looks like plastic but it's not.

Why is this here?

Braided bully sticks are cooked for a long time - up to 48 hours. In order to hold the braids together so that they don't unravel during the cooking process, we use a tough, natural material that keeps the bul-
lies tightly braided together.

Is it safe for dogs?

It's completely edible, digestible, and safe for your dog to consume.
