

HIGHLIGHTER DUST FOOD GRADE SHIMMER PIGMENT TECHNICAL DATA SHEET

FOOD-GRADE MICA-BASED PEARLESCENT PIGMENT POWDERS

Appearance: Shimmery sparkle powder with small particle sized pieces Intended as dry or wet application for confectionery projects. Perfect for brushing on dry, or mixing with liquid for painting, airbrushing or "sponging" on the desired product.

Ingredients: Each of our Highlighter Dusts are made with a food grade Mica-Based Pearlescent which meets all FDA requirements for Food Grade and Edible Pearlized Mica Mineral; Additionally, they may contain one or more of the following food grade & FDA approved ingredients depending on the color. Rice protein, corn starch, dextrose, various FD&C color additives. Exact ingredients for each individual color, listed in the chart below.

USES, SPECIFICATIONS, FDA COMPLIANCE & RESTRICTIONS:

The FDA has approved all the ingredients being used in our edible glitters & edible dusts based on the FDA approved ingredients & usage levels. However, to learn more about the FDA approved usage levels and the approved ingredients list from the FDA read "Substances Added to Food" at FDA.GOV & "FDA Approved Usage Levels" Article 73.350 and more.

- Pearlized Mica may be safely used as a color additive in amounts up to 1.25% in food and 0.07% in alcohol beverages of this product, by weight, in cereals, confections/frostings, gelatin desserts, hard/soft candies (including lozenges), nutritional supplement tablets/gelatin capsules, chewing gum, distilled spirits (alcohol content 18-25% w/w).
- Cordials, liqueurs, flavored alcoholic malt beverages, wine coolers, and cocktails.
- Non-alcoholic cocktail mixes and mixers, such as margarita mix, Bloody Mary mix, and daiquiri mix, but excluding eggnog, tonic water, and beverages
 - that are typically consumed without added alcohol (e.g., fruit juices, fruit juice drinks, and soft drinks).
- In egg decorating kits used for coloring the shells of eggs in amounts consistent with good manufacturing practice.
- The color additive may not be used to color foods for which standards of identity have been issued under section 401 of the act, unless the use of the added color is authorized by such standards (ref 21CFR73.350) *Please always refer to the FDA's latest information.

Edible Glitter Biodegradable Statement: All of our edible glitters are biodegradable. By utilizing certified synthetic and natural mica, we can ensure our edible glitters are free of PET plastic glitter. As such, our edible glitters are biodegradable, safe pigments with no concerns regarding landfill, waste or waterways. Please note, most "claimed" edible glitters on the market may not be biodegradable, and our biodegradable food safety statement is only specific to the edible glitter products manufactured and produced by Bakell®.
