

# Pet Paw Mesh Guard

Pet & Paw Barrier Mesh is a Super Tough mesh barrier that can be added to the lower part of your cat netting enclosure. It is ideal for use with cat enclosures as it is soft to touch, yet very hard to damage. Pet & Paw Barrier Mesh is an ideal "additional" barrier that can be added to new or existing enclosures for added protection against:

- ☞ Snakes
- ☞ Smaller and more passive dogs
- ☞ Small Children
- ☞ Other animals and pests...

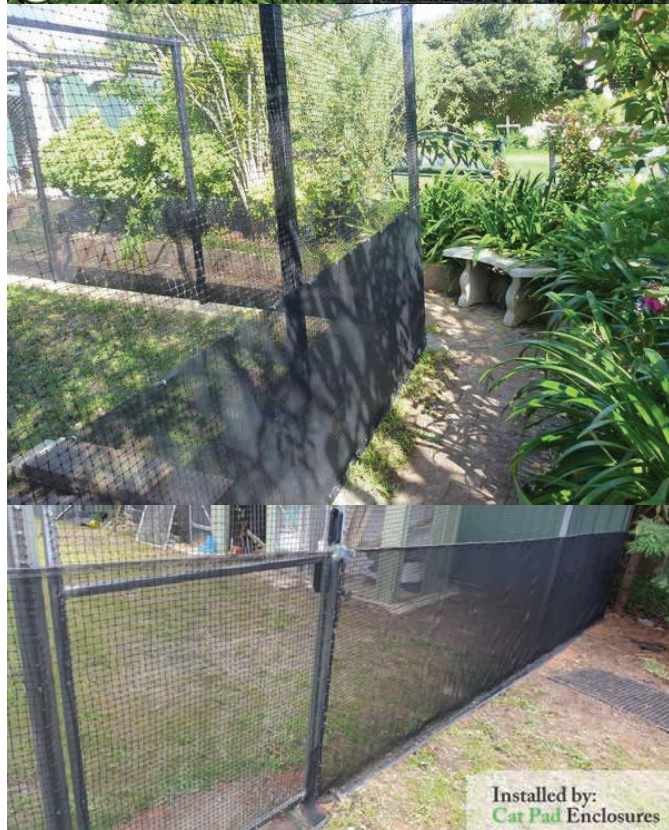

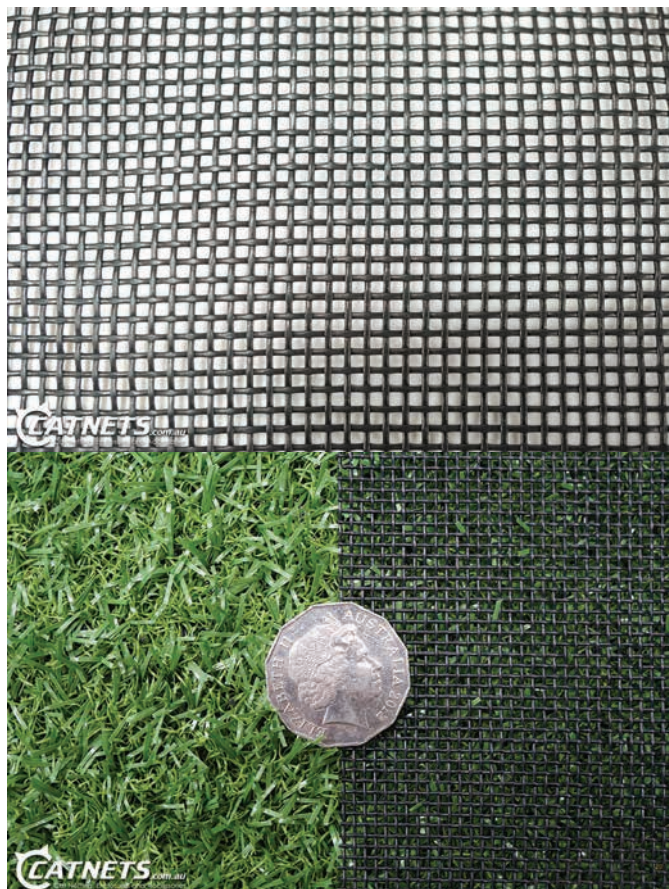

## Pet Paw Mesh Guard Features

- ☞ Super tough vinyl coated polyester woven fibre mesh
- ☞ UV Treated - will not corrode or rust
- ☞ 20 times stronger than fibreglass mesh
- ☞ 1.25m Height
- ☞ Hole Size 1.2mm x 1.2mm

## Installation

- ☞ Pet & Paw Barrier Mesh is only required along the lower part of enclosures.
- ☞ It is installed over the top (in conjunction with) standard cat netting. Once your normal cat netting enclosure is installed, Pet & Paw Barrier mesh is then installed around the cat netting. It can be installed either on the inside or outside of your enclosure depending on the individual circumstances of your enclosure.

Note that Pet & Paw barrier mesh will catch the wind slightly more than normal cat netting.
