

# Standard D.I.Y. Zipper Kit

The Standard Zipper Kits are a simple and effective way to create a secure 'step through' entry into your new enclosure.

Designed to provide the ability to maintain your enclosure for the health and safety of your cat/s, the Standard Zipper Kit systems are an essential part for all enclosures that do not have a built in gate or alternative entry.

These zippers come separate from your netting and require sewing into position. The recommended method is to erect your netting enclosure, visualise the exact positioning of the zipper and then sew it in using the supplied twine. Once you're happy with the location and installation of the zipper, the netting is cut directly behind the zipper to create the opening.

Included in Kit:

- ☒ 2m Zipper Length with slider
- ☒ UV Treated Binding Twine
- ☒ Large Eyed Sewing Needle
