

Stainless Steel Wire Rope

Catnets.com.au stocks 7-Strand, top quality Stainless Steel wire rope. Diameter is 1.8mm, which is strong, yet flexible enough to work with effectively. Breaking strain 230kg.

Stainless Steel Wire Rope Grips

The Stainless Steel Wire Rope Grips (see picture 2) are a tensioning device, used to lock the wire in a loop around both the eye of the Turnbuckle (see picture 3) and the relevant fixing at the opposite end of the run of Stainless Steel Wire Rope.

Stainless Steel Turnbuckles

The Stainless Steel Turnbuckles are designed to tension the Stainless Steel Wire Rope in your run, this is achieved in a few quick steps:

- ☞ Fully extend the hook and eye of the turnbuckle.
- ☞ Connect the necessary Wire and Wire Rope Grips to the Turnbuckle and fixings.
- ☞ Attach the hook to the desired fixing.
- ☞ Twist the centre of the Turnbuckle until the hook and eye's bolts meet in the middle.

C-Clips System

The C-Clips are used to clip our 19mm Cat Netting onto Stainless Steel Wire rope. This system offers a very neat and secure means to attach the cat netting.

The C-Clip system is:

- ☞ Very strong
- ☞ Low visibility
- ☞ Rust and corrosion proof
