

Collection 2021

 Hayche

**We create original,
timeless furniture
through exceptional
craftsmanship and
inspired collaboration.**

Loom lounge chair manufacturing process

We are Hayche.

Hayche is an award-winning design led furniture manufacturer that creates original and meaningful pieces for discerning clients. London based, but with a global outlook, we embrace contrasts and celebrate differences, bringing together carefully curated and beautifully crafted collections that enrich peoples lives.

Our beliefs.

We believe in creative expression; in progress with purpose; in tradition and innovation; in pieces that stand the test of time. We explore new possibilities and methods; we consider history to forge a better future; and we strive to create imaginative, authentic, beautiful and practical products.

Our culture.

Everything we do, we do with love and care. The details drive us — from design and materials sourcing, to manufacturing and finishing. For us, quality is paramount and can never be compromised. We want to do things the right way, sustainably and without shirking our responsibilities.

We don't just want to build a business, but to find a balance between culture and commerce. We encourage an open attitude that fosters inventiveness and collaboration and is built on mutual respect and trust. We invest in relationships, making sure that everyone we work with feels valued and truly integral to what we're doing.

Our materials.

We love solid wood and the sense of warmth it brings. But we also enjoy compelling juxtapositions with other premium, natural materials. We choose materials for their beauty, purity, honesty and sustainability.

Our collaborators.

We are curators and editors of design, working with emerging and established international talent from different creative disciplines, to collaborate together in the creation of outstanding furniture. We also have strong relationships with skilled, established suppliers all over the world. They provide a combination of state-of-the-art technology and time-honoured craftsmanship.

Our prices.

We keep our prices reasonable considering the complexity of the manufacturing process. We will always charge a fair price for our products, given the cost of materials and production.

Our service.

We give our customers a personalised and warm service experience. We are here to build relationships, to assist and support them all the way throughout the process.

We like to think that we give our customers more than they would expect.

Our legacy.

We aim to have a positive impact in the industry. But more than anything, we want to improve the everyday, bringing imagination and nourishment into people's lives.

Tailor Made

One of the truly unique elements of Hayche is the fact that Founder and Creative Director Alejandro Villarreal, is both an Architect and a Product Designer.

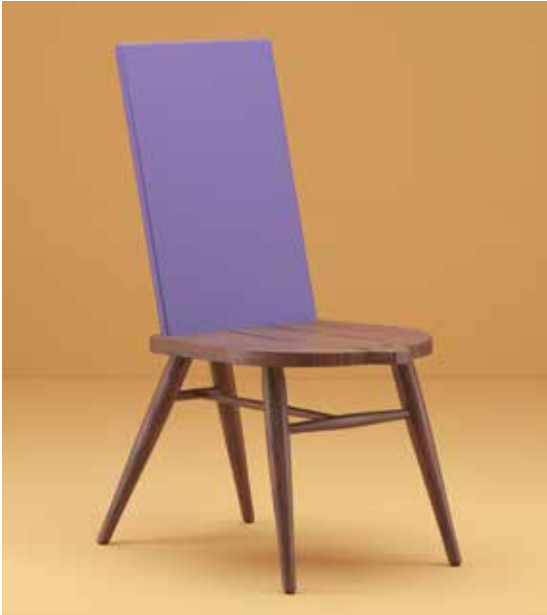

Embracing large scale schemes such as BTR and PRS is our forte. We work side by side with the client to design pieces specific to brand or specification, ensuring that the collection is unique and tailor made.

Although our positioning is always design led, the overarching goal is cost saving for our clients and with a manufacturing capability that enables us to accommodate volume, we deliver quick turnaround and guarantee to come in within budget and on time.

By also offering a custom made service to our clients we can accommodate specific projects that require individual attention to detail on made to measure pieces or offer amendments on designs within our portfolio.

Please get in touch at sales@hayche.com to discuss your project in more detail.

Silla Ella & Silla El, Hotel Xcaret Arte,
Cancun, Mexico

Chairs Barstools

Backer Chair

Designed by Daniel Schofield

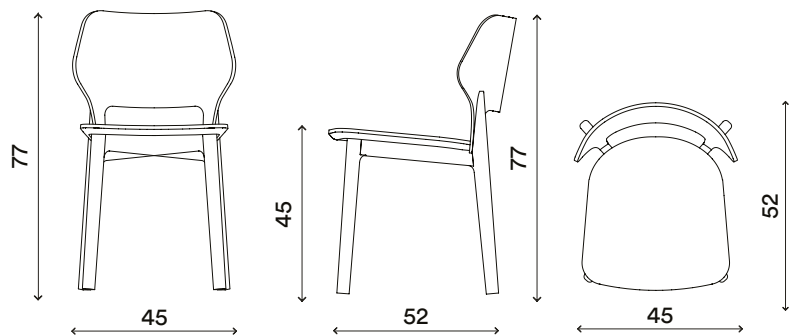

The elegant Backer chair uses a sweeping curve that gently wraps the back support and is the unique point of difference in this considered oak design.

The Otto armchair is a playful and sophisticated piece that blends a simple and functional metal frame, with a sculptural and warm plywood backrest and seating area. The metal connector between the armrest and the metal frame adds a clear and distinctive touch.

Otto Armchair

Otto Armchair

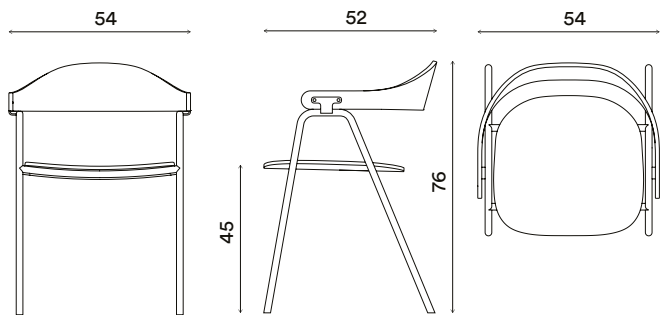

Designed by Alejandro Villarreal

The armchair is stackable up to 4 chairs and comes in 3 different finishes: white metal frame & oak plywood, black metal frame & oak plywood and black metal frame & walnut plywood. The playful juxtaposition of materials is typical of its designer, Alejandro Villarreal.

Technical Information

Finishes

Oak & White

Sku: OT202
Finish: White RAL 9003,
Lacquered oak veneer

Oak & Black

Sku: OT201
Finish: Black RAL 9005,
Lacquered oak veneer

Walnut & Black

Sku: OT205
Finish: Black RAL 9005,
Lacquered walnut veneer

Material

Powder coated steel base, oak veneer on formed birch plywood. The metal frame is a low VOC powder coated steel base, and the FSC oak veneer is applied on formed birch plywood. All the components of the armchair are easily detachable, aiding in the process of reparation, renovation and recycling.

The Otto armchair is also available in COM upon request for the seating pad.

WW Bar Stool

Designed by Alejandro Villarreal and Studio Makgill

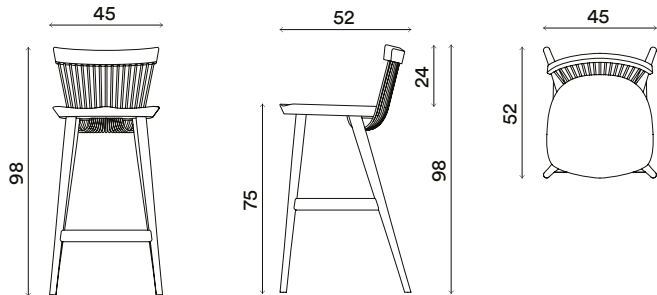

Based on a modern Windsor design, the WW bar stool, where the first 'W' stands for Windsor and the second for Wire is an iconic piece of furniture. Produced from solid oak with the unique 'wire' backrest formed from mild steel rods which are delicately bent and secured beneath the seat, suggesting suspended cord and adding a lightness to what is a very robust piece of furniture. With an extended Colour Series adding even further to the uniqueness of this chair, WW is a true beauty.
