Material Selection Guide

Stencil Ease laser cuts durable reusable plastic in the following material specifications:

HEAVY-DUTY 1/16" & 1/8" LLDPE PLASTIC

Stencil Ease is now manufacturing all parking lot stencils, athletic field stencils and many others on a new "super-durable" plastic called LLDPE. Our current stock is all 1/16" and 1/8" and results from our core contractor base have been all positive

OUR NEW LLDPE: (Linear Low Density Polyethylene)

- Can be rolled and flattened out without curl
- Sheds paint with ease and won't crack or break
- LLDPE has a higher tensile strength than other plastics
- LLDPE has a higher impact and puncture resistance than other plastics
- Superior stress crack resistance
- Superior resistance to chemicals

sheds paint

Medium-Duty 14 mil = 0.014 inches (0.36 mm)

Uses: this is a durable polyester plastic. It is durable enough to withstand heavy repeated use and multiple cleanings. 14 mil is ideal for use with rollers, paints and industrial inks. This material is not recommended for fine decorative applications when paint is being rolled on. It is suggested for relief stenciling with plaster or paste.

Light-Duty 10 mil = 0.010 inches (0.25 mm)

Uses: for projects that require moderate repeated use and repeated cleaning of a stencil. The 10 mil film can be used with brushes, rollers, inks and most paints and stains. If you will be using spray paints, inverted marking sprays or landscape chalks we suggest a thicker material.

Standard Painting Material 7.5 mil = 0.0075 inches (0.19 mm)

Uses: for basic wall applications and decorative stenciling. Best used with stencil brush, high-density foam roller, sponge painting and faux finish applications. Not recommended for spray painting on parking lots and concrete. Stencil adhesive spray should be used with this material to adhere well to surface.

Adhesive-Backed Mylar Material 7.5 mil = 0.0075 inches (0.19 mm)

Adhesive-backed, 7.5 mil material, comes with a repositionable, medium-tack, backing to secure your stencil in place. This durable, reusable, plastic material can be used on any painted surface, floor, sign, car, boat or craft project. The adhesive-backing assures that paint will not seep under the stencil design if you are using liquid paints, spray paints, inks or other mediums. Additionally, the quality of this material will allow you to lift the stencil from the surface and reposition it securely onto your surface over and over again

Low-Tack Adhesive-Backed Vinyl 6 mil = 0.006 inches (0.16 mm)

Uses: Trucks, boats, walls or any job that requires precision stenciling. Our peel and stick low-tack vinyl can easily be removed from any surface and reapplied. Ideal for air brush, spray or roller applications.

Parking Lot and Road Marking Stencil Kit

27-PIECE STENCIL KIT

The Stencil Ease parking lot and road marking stencil kit comes with everything needed to finish a commercial, industrial or school parking lot. The stencils are made from durable, reusable 1/8" or 1/16" plastic. They can be cleaned and reused many times. All stencils have a minimum 3-4 inch border for overspray. We suggest using inverted spray marking paints or traffic paints for parking lot and road applications (see page 11). Ships in a 12" x 12" x 48" box; 1/16" material weighs 39 lbs; 1/8" material weighs 75 lbs.

The parking lot stencil kit contains the following items:

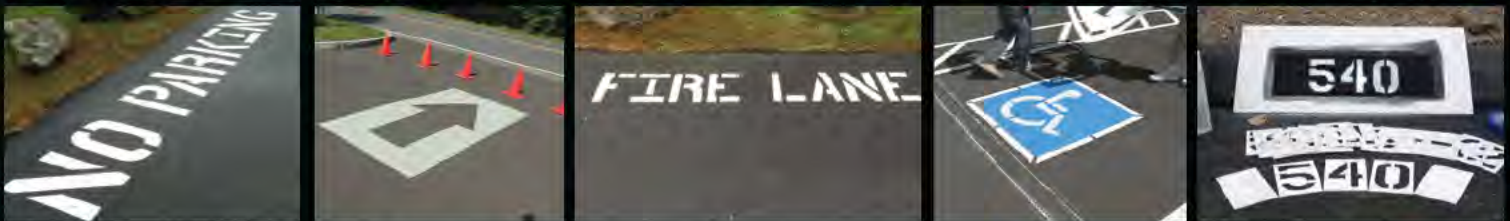

- | | |
|--|--|
| 1) 39" Standard 1- part Handicap stencil | 15) 20" high x 42" wide - Arrow stencil straight |
| 2) 4"x31"- NO PARKING stencil | 16) 18.8" high x 42" wide - Arrow stencil curved |
| 3) 6"x49"- NO PARKING stencil | 17) 12" Number Set - 12" numbers 0-9 in Parking Lot style |
| 4) 12" x 94" - NO PARKING stencil | 18) Line stencil - 4" wide x 92" long (comes on a 12" x 96" sheet) |
| 5) 4" x 27.5" - FIRE LANE stencil | |
| 6) 6" x 40" - FIRE LANE stencil | |
| 7) 12" x 82" - FIRE LANE stencil | |

MUTCD Federal Specification Stencils

MUTCD stencils were designed specifically to meet the D.O.T. specifications and will help your organization meet current federal regulations. Our MUTCD stencils are laser-cut on durable 1/8" or 1/16" thick LLDPE plastic that lays flat and guarantees professional painting results. These stencils can be used with any painting equipment or spray application available. All stencils can be cleaned and reused many times. This stencil is cut on a sheet size that guarantees a minimum of 3" around for overspray.

For additional resources on MUTCD visit: www.mutcd.fhwa.dot.gov.

FAA Specification Airport Stencils

As FAA guidelines change and runway markings fade, stencil painting should be done every couple of years. Painting airport runways and taxiways will help your organization meet current federal regulations. Our many sizes of runway stencils are laser-cut on LLDPE plastic that lays flat and guarantees professional painting results. Larger characters ship as two-piece sets that fit together using tabs to ensure accuracy. Our stencils can be used with any painting equipment or spray application available and are meant for heavy industrial use.

U.S.A. Map Stencils

Our complete range of U.S.A. Map Stencils are very easy-to-use and make a great project for any playground or park area. Our sturdy sheets of LLDPE plastic can be used for painting or tracing on any outdoor or indoor surface. Each map stencil comes with a layout guide showing you where to put each piece. Once the pieces are laid out, simply spray paint the dots or cut-outs and remove the stencils. You can fill in the states with different colors or leave as is. The stencil sheets can roll up to store for future use.

Storm Drain Stencils

Storm drain stenciling consists of stenciling a message next to a street drain reminding people that storm drains can flow directly into rivers, lakes, streams, sounds, or oceans. Projects like this are ideal to create community awareness about underground piping areas that actually flow to streams, rivers, lakes, oceans or even public water supplies. Stenciling messages next to storm drains is the best way to alert people that NOTHING should be dumped into these (storm) drains.

CAMO Stencils and Paint

visit our web site for many more options

Camo stencils can be used for creating patterns on trucks, boats, wood surfaces, duck blinds, deer blinds, walls, floors and fabrics. The paint can be applied through the stencil with camo spray paints or liquid paints using our high density foam rollers. Camo stencil designs repeat in all directions allowing you to customize any size project. All camouflage stencils can be ordered on any of our materials. For trucks, boats and other surfaces where a precision look is needed we suggest using our adhesive-backed materials. Most camo stencils can be ordered in a variety of sizes.

Krylon Camouflage Spray Paint

This ultra-flat paint is non-reflective to provide the ultimate camouflage. The 11 oz. can gives you up to 25 sq. ft. of coverage. Fusion technology allows paint to stick to any surface, even plastics and hard vinyl.

- Bonds to most plastics
- No sanding, no priming
- Ideal for sporting and hunting equipment, decoys and more
- Fast dry; fully chip-resistant after 7 days

11 oz. can \$9.83 ea.
6-pack of 11 oz. spray cans \$44.98

Pool Area Marking Stencils Kit

The Stencil Ease Pool Area Marking Kit comes with everything needed to mark a swimming pool area. These swimming pool stencils are made from durable, reusable 60 mil (1/16 inch thick) plastic or flexible 10 mil polyester plastic (10 mil is best for roller applications). We suggest that you consult an expert for information on what types of paints to use.

Item# KCC0007-10 10 mil light-duty \$103.40
Item# KCC0007-60 1/16" thick heavy-duty \$148.35

Industrial Marking Paints

The Krylon® "Contractor" 15 oz. can is an inverted spray paint that meets specifications for any stenciling job, utility marking, construction site or public works project. Water-based inverted marking paints have a high solids formulation that gives them the boldest, brightest and most visible markings in the industry. These fast-drying products penetrate and adhere to all surfaces, delivering coverage you can count on for all of your marking, surveying and stenciling needs. Sold as individual cans or in cases of 6.

• Lead-free
• APWA spec. colors
• Spray-thru™ cap
• VOC compliant

Temporary Marking Chalk

Krylon® Marking Chalk adds temporary chalk lines in high visibility color. Depending on application, chalk lines can last from 15-45 days (or you can extend with chalk line clear spray).

- Easy removal from hard surfaces
- Sprays upside-down for easy marking
- Fast-drying, water-based formula
- Dry-to-touch in 10 - 15 minutes
- Use on pavement, concrete, gravel, soil, grass and more

15 oz. spray can

6-pack of 15 oz. spray cans
\$41.23

Cover-Up Black Stripping Paint

Cover-Up Black is a solvent-based inverted marking paint that can be used to cover old markings, stenciling mistakes or overspray problems. When stencil letters, numbers or arrow stencils won't quite line up, Cover-Up Black is always handy to have on the job.

- Inverted Spray tip
- Dry to Touch in 30 minutes

15 oz. spray can
\$9.53 ea.

Hand Held Spotter

The Krylon® Industrial Quik-Mark™ Hand-Held Spotter Wand. The 12" Spotter Hand-Held wand is constructed of durable, rugged plastic and lightweight steel with a comfortable pistol grip for easy handling and marking. Eliminate the annoyance of paint or chalk on your fingers!

#TAP7095 \$22.77 ea.

6-pack of 12" Spotters
#TAP7095-6 \$124.27

Stencil Ink Rollers

New Oneshot® Stencil ink roller marking system is ideal for any letter, number or custom stencil marking project. All you have to do is attach the ink cartridge to the roller head, pump the trigger, and you have a neat and efficient marking system. The roller assembly features a durable neoprene roller. The valve-action pump as shown in the photo controls the ink saturation.

These inks work on both porous and non-porous surfaces and meet government ink specifications TT-I-1795A and CID A-A-208 Type 4. Seven highly visible colors meet CONEG and SARA standards and are for indoor and outdoor use. Opaque pigments will not fade when exposed to ultraviolet light. Can be used on surfaces including steel, wood, glass, plastic, metal drums, & more.

3" Oneshot Stencil Ink Roller comes with Black
T0881 \$64.61 ea.

Stencil Markers

These stencil markers are made for hard-to-mark surfaces. They make bold, permanent marks on almost any surface, including metal, wood, plastic and glass. Fast-drying, permanent ink that won't chip. Weather and fade resistant. GP-X markers can be used to outline stencils and stencil templates before marking, painting and cutting.

Jumbo Insta-Marker for waterproof marking on porous and non-porous surfaces
Item# MMM0912 \$3.42 ea.
