### What CBD Does

**What is CBD?** Cannabidiol, also known as CBD, is one of over 60+ naturally occurring cannabinoid compounds found in Cannabis. CBD oil is derived from an organic substance formed in the plant’s secretions. Unlike THC, CBD does not cause any feeling of “high,” which contributes to its legalization across the United States. CBD does not typically have any immediate noticeable effect.

**What does it help treat?** CBD is a natural anti-inflammatory. CBD Cream is most popularly used for localized pain relief, muscle soreness, tension, and inflammation.

Some attributes of CBD are: Antibacterial, Inhibits cancer cell growth, Neuro-protective, Promotes bone growth, Reduces seizures and convulsions, Reduces blood sugar levels, Reduces inflammation, Reduces risk of artery blockage, Reduces nausea, Relieves pain, Relieves anxiety, Slows bacterial growth, Treats psoriasis, Vasorelaxant.
