

ALUMA SHINE

**NON ACID
ALUMINIUM TRUCK BODY
And
AIR CONDITIONER COIL
CLEANER AND BRIGHTENER**

ALUMA SHINE is a speciality product, for cleaning and brightening aluminium, without the normal fears of using an acid type product.

It is highly concentrated and may be diluted with up to 30 parts water, for easy application, even through a pressure sprayer.

ALUMA SHINE will dissolve and disperse oil, grease and carbon accumulation. It is also effective in clean up of vents, hoods and fans.

Spray **ALUMA SHINE** on the surface to be cleaned following dilution rates on the label. Allow 5 minutes for the chemical to penetrate and emulsify the grease and grime. Then agitate gently with a brush. Do not allow product to dry on surfaces applied. Follow with a clear water rinse. Repeat if necessary.

Refer to the Material Safety Data Sheet for safety information.
FOR INDUSTRIAL and INSTITUTIONAL USE ONLY.
