

## PRODUCT DATA

# **HARD WATER DETERGENT**

## **WAREWASHING DETERGENT**

**Especially formulated for hard water areas**

A non-chlorinated, non-foaming, highly concentrated warewashing detergent for use in both low and high temperature dish machines. This heavily concentrated detergent is designed to provide a unique blend of water conditioners, soil suspending agents and the necessary alkalinity to tackle tough greasy soils at low doses per rack.

**HARD WATER DETERGENT** contains conditioners and defoaming agents, to prevent food soil foams from developing. May be used on most types of plasticware, china and silverware. Not recommended for aluminum cookware.

**Directions:** For better cleaning always scrape off excess food soil and other particles, before racking dishes. This will help prevent their entry into the wash tank which otherwise would cause foaming and prevent good cleaning. Rinse with moderately warm or hot water.

**NOTE:** Product may damage or discolor aluminum or other soft metals, plastic and laminate countertops or other surfaces likely to be harmed by alkaline materials.

Check with your local health authorities for mandatory sanitizing requirements.

**Refer to the Material Safety Data Sheet for safety information.  
FOR INDUSTRIAL and INSTITUTIONAL USE ONLY.**
