

PRODUCT DATA

MULTI SHINE

MULTI SHINE is a metal-interlocked detergent resistant floor finish. It is formulated with a high solids content of non-yellowing polymers. This unique formulation dries quickly (30 minutes) which allows for rapid recoatability. **MULTI SHINE** is scuff resistant and longwearing. Will not build-up or yellow with age.

Ideal for use on all floors with the exception of unsealed wood floors. Compatible with all finishes of comparable solids content and composition.

Floor Preparation - Remove old wax and finish if necessary using **MULTI STRIP**. Rinse floor thoroughly with clear water, allow to dry. Then seal with **TOP SEAL**.

Application - Apply **MULTI SHINE** with a clean mop or applicator. The second coat can be applied as soon as the first coat is dry. Air movement and temperature will shorten drying time. Four coats will give maximum gloss and floor protection. Covers 700 to 900 square feet per litre.

Maintenance - Mopping with a good floor detergent such as **TURBO CLEAN** is usually sufficient. Wet scrubbing or dry stripping may be indicated if floor is badly soiled.

Re-Coating - Clean the floor by any of the above methods using **DEEP SCRUB** and apply one or two coats of **MULTI SHINE**.
