

PRODUCT DATA

MULTI STRIP

FOR REMOVAL OF ALL TYPES OF FLOOR FINISHES AND WAXES

This powerful stripper eliminates much of the labour involved in the removal of heavy build-up of finish or wax, by doing the work for you.

It quickly and thoroughly loosens, emulsifies, and holds in suspension-

**METAL COMPLEX FINISHES
METAL COMPLEX WAXES**

**ACRYLIC FINISHES
WATER EMULSION WAXES**

- so they can be rinsed off, leaving floors thoroughly clean and free of residue. For use in hot or cold, hard or soft water.

MULTI STRIP can be used on any surface not harmed by soap and water -
ASPHALT, LINOLEUM, VINYL, RUBBER, MARBLE, TERRAZO and CEMENT.

MULTI STRIP is a welcome change from some of the noxious cleaners it replaces. This new generation product eliminates the need for an ammoniated stripper, which in the past was necessary for removal of such coatings as metal interlock floor finish. These coatings are now removed easily, without the hazard and unpleasant odour of ammonia.

DIRECTIONS:

FOR ORDINARY FINISH OR WAX REMOVAL - Dilute 1 part product with 8 TO 10 parts water.

FOR REMOVAL OF HEAVY FINISH OR WAX BUILD-UP - If many coats of finish have built up, it may be necessary to use this material in a 2 or 4 to 1 dilution. Apply the cleaner to the area to be stripped and allow to remain at least 15 to 20 minutes, keeping lightly wet with small additions of water. Then scrub thoroughly, preferably with a scrubbing machine, but a long handled deck scrub will work satisfactorily. The scrubbing must be uniform over the entire area to ensure evenness of removal.

FOR EXCESSIVE FINISH OR WAX BUILD-UP - A 2 to 1 solution may be used. Directions as above.
