

**ALL DEODORISERS ARE NOT CREATED EQUAL**

**SEABREEZE** is a naturally renewable odor neutralizer that **PERMANENTLY** traps and absorbs odours.

It is not an antimicrobial or a chemical odor masking agent.

**SEABREEZE** is composed of complex zinc salts of purified and naturally renewable ingredients. It effectively **fixates** a wide range of odorous compounds. It binds with organic waste and decomposition odours. It captures odors associated with humans, animals, food, chemical processes and smoke.

**SEABREEZE** is effective in liquid, spray, fogging or mist applications.

**SEABREEZE** removes unpleasant smelling substances from the ambient air or prevents their emission into the environment. These odours include chemically based materials:

- amines (nicotine in cigarette smoke) - thio compounds (allicin in garlic and onions - cooking smells) -acids (e.g. isovaleric acid, butyric acid in human sweat - body odours)

Use **SEABREEZE** in...

- Hotels, apartments, holiday units, homes, foyers, lifts and stair wells, Washrooms, toilets, change rooms and urinals
- Hospitals, nursing homes, sick rooms, clinics and child care centres
- Pubs, bars and clubs
- Cars, trucks, buses, trains and public transport
- Pet hotels and kennels
- Garbage rooms, confined spaces and any other areas where odour is a problem.

Read the label and Material Safety Data Sheet before handling this product.
