TURBO STRIP

NON-AMMONIATED STRIPPER

Easily removes extreme wax build up

TURBO STRIP is a versatile all-purpose wax and finish remover. It is formulated to remove all types of floor finishes and seals from resilient tile floors.

When applied at the recommended dilution it quickly liquefies burnished floor finish films and heavy wax build-ups.

TURBO STRIP contains no solvents, ammonia or free alkali.

1. Sweep or dust mop the area to be stripped.
2. Apply a diluted solution of **TURBO STRIP** to the floor (see below). Allow the stripping solution to stand 3 to 5 minutes.
3. Manually scrub floors using a long handled brush or machine scrub using a black stripping pad. Pick up solution with a wet mop or wet pick-up vacuum. Do not allow stripping solution to dry on the floor.
4. Allow floor to dry, then buff using a red polish pad. This will result in a higher gloss and longer lasting finish.
5. Apply desired seal or finish.

Directions:

Add 1 part of product to 8 parts of hot water. Floors should be thoroughly wet, but not flooded. Allow solution to penetrate for 15 minutes. Pick up with mop or squeegee. Rinse with clean hot water.

For Extreme Wax Build up: Mix 1 part product with 2 parts hot water. Scrub area thoroughly and apply more stripper if necessary. Allow 10-15 minutes for soaking action. Scrub again and pick up with mop and warm water. Rinse thoroughly with clean hot water.
