

DUST OFF

Oil-Base- Liquid Treatment For Dust Mops and Cloths

DUST-OFF is a petroleum based dust mop/cloth treatment. Formulated to attract dust and debris to the yarn of the mop.

Mops treated with **DUST-OFF** have a superior ability to pickup and hold dust.

DUST-OFF reduces the circulation of dust in the air during sweepings thereby reducing the spread of disease-causing microorganisms.

Excellent for use on asphalt tile, vinyl, linoleum, terrazzo, rubber tile, cork, composition, wood, cement or any hard surface floor.

To save time when dusting furniture treat your dusting cloth with **DUST OFF**, its excellent for all hard surface dusting.

TREATING THE MOP - Determine the amount of **DUST-OFF** to be used by dividing the length of the mop in inches by (3). The result is the number of ounces of product to use (example - one 24 inch mop requires 6 ounces of product).

To get the best performance, treat the dust mop by applying **DUST OFF** to the back of the mop head. Roll the mop up placing it in a plastic bag and allow it to set 8 hours before use. To treat the mop while it's on the frame, spray the required amount onto the back of the mop and allow 8 hours for absorption. To enliven a mop after repeated use simply spray a light mist onto the face of the head.
