

# E Z GO

## Waterless Hand Cleaner with Grit

**E Z GO With Grit** is an industrial grade, waterless, hand cleaner. Designed for use where there is a need for more aggressive cleaning action.

**E Z GO With Grit** contains special, naturally occurring solvents and a mild grit that provides the needed scrubbing action. Loosens tenacious soils. Will not cause dryness or chapping even with repeated use.

Recommended for use in machine shops, print shops, garages warehoused, and other industries where hands come into contact with grease, oil, paint, ink, and resins.

Apply a small amount to hands. Rub into all soiled areas. Use enough cleaner to thoroughly wet the soil. Wipe off with cloth or towel. To remove any residual soil, reapply and repeat the above procedure. If desired wash hands with soap and water.

Refer to the Material Safety Data Sheet for safety information.  
**FOR INDUSTRIAL USE ONLY.**
