WIRE WHEEL CLEANER

Non Acid

- EASILY REMOVES BRAKE DUST, DIRT, & GRIME
- SAFE ON ALL WHEEL TYPES - IMPROVES THE APPEARANCE OF ALL TYPES OF WHEELS WITHOUT HAZING OR DISCOLORATION.
- SAFE FOR USE ON ABS PLASTIC, CHROME, ALUMINUM, WIRE, AND MAG WHEELS WITH CLEARCOAT, POLISHED, PAINTED, OR ANODIZED FINISH

Automotive rims are manufactured with various finishes, so Wire Wheel Cleaner has been formulated as an acid-free cleaning agent for lacquered aluminum, steel, wire and painted wheel rims etc. It effectively removes brake dust, grease, oxides, oil, salt, soot and road dirt. Wire Wheel Cleaner breaks up your toughest road grime to reveal clean and bright chrome and cast aluminum wheels. It removes oxidation, haze, and some surface corrosion without much scrubbing. Use it on wheels and bumpers for a crisp, clean shine.

Directions: Apply Wire Wheel Cleaner to a cool, wet wheel. Wait 1-2 minutes and rinse. Heavily soiled wheels may need to be gently agitated with a soft wheel brush. Dry wheels with a soft, microfiber towel to prevent water spots.
