

Go Eco Store Compost Bucket

The Go Eco Compost Bucket is your solution to easy, out of sight composting at home. Compact in size, measuring 27cm x 24cm and holding approximately 10L. It is Australian invented, manufactured and owned too!

- Diverts food waste from landfill
- Breaks down food waste fast (within weeks)
- Add ALL food scraps from the kitchen
- Eliminates smelly bins and wrigglies
- Reduces harmful methane gasses
- The worms and bugs do all the work
- Super easy to install and out of sight
- Locking lid keeps rodents and pets out
- No smells or odours produced

Step 1

Find a spot in your garden and dig a hole the size of the Go Eco Compost Bucket, place the bucket in so the rim is just above the soil level.

Step 2

Remove locking lid and add your food scraps with water into the Go Eco Compost Bucket then close the lid to keep out rodents and pets. Continue adding food scraps with water until the bucket is full.

Step 3

Once your first Go Eco Compost Bucket is full, move onto your next bucket and so on until you return to your first bucket. No need to empty contents, simply add food scraps with water, to the broken down material.
