

# Method Recycling Posters

We have compiled these recycling posters for our main streams that you can post above your bins, this will help ease the transition to Method bins and help staff learn how to accurately sort their waste.

For landfill, mixed recycling and co-mingled recycling there are two posters, this depends on whether you have an organics bin or Container Deposit Scheme bin or not, please only print the one that is relevant to your facility. The posters look best when you trim off the white border after printing.

Please note: these have been designed to cover the basics and are not comprehensive, as all areas and waste management firms have different regulations. If you would like us to design comprehensive posters or labels specified to your facility at an additional cost please contact us [here](#).
