

GUIDE TO USING YOUR CARRIER

ARMS UNDER POSITION

Babies 6 months of age and under,
or when head support is required.
Minimum weight 4kg/9lb and 53cm length.

ARMS OVER POSITION

Babies over 6 months, or when head
support is not required. Maximum weight
15kg/33lb and 66cm+ length.

STEP 1 Unclip the right waist buckle and right shoulder buckle to open carrier. Feed carrier over your left shoulder. Turn the base of the carrier up towards you to create the 'bucket seat position' and fasten the waist buckle into place. Listen for a loud click to ensure the buckle is secured correctly. Adjust waist straps to ensure carrier sits firmly against your body.

STEP 2 Hug baby over your right shoulder (facing in towards your chest) and feed babies right leg through the carrier so their bottom sits comfortably in the centre and baby is in the 'M' seat position. Ensure baby is supported at all times and their weight is distributed evenly.

STEP 3 Hold baby securely with left hand and take hold of the easy-find cord located near buckle clasp on the right shoulder strap. From behind, pull the shoulder strap up and over your right shoulder using the cord.

STEP 4 Fasten the shoulder buckle and listen for a loud click to ensure buckle is secured correctly. Ensure all 4 buckles are secured before removing your hands from infant. Adjust carrier as required using the pull tab sections and front pull over tabs to ensure carrier is firm across your back, with baby's weight evenly distributed.

STEP 5 Once carrier is in optimal position, pull the neoprene sleeves over shoulder safety buckles. You are now ready to begin using your carrier.

REMOVING YOUR EXPLORER CARRIER Exit water completely before removing baby from the carrier. Cross your left arm over the carrier and undo the right buckle with two hands, holding the bottom buckle firmly to support the weight of your baby. The buckle will click when released. Let go of right shoulder strap, then firmly hold babies right, then left, armpits and carefully lift baby up and out of the carrier. Place baby in a safe location before unbuckling the waist buckles and removing your carrier.
