

# Troches: Optimize Dosing, Optimize Health

## Patient Benefits

- ◆ **Adjustable Dosage, Scored**
- ◆ **Faster Absorption (SL, buccal)**
- ◆ **Thin and Comfortable Shape**
- ◆ **Faster Onset of Action**
- ◆ **Improved Patient Compliance**
- ◆ **Variety of flavor options**

### Dear Prescriber,

Our compounding pharmacist has developed a new dosage form: R.D. Troches. Available almost exclusively through our pharmacy, R.D. Troches provide unique advantages for patients like never before. Whether your patients need the same dose every day, use variable doses, or need to titrate their doses, they can use a custom-made, specially-flavored troche for faster absorption. Patients that need to adjust their dosage can do so at home without a new prescription, reducing their costs and efforts. Each troche is triple scored, and can be cut into halves or quarters for easier titration than ever.

These troches can be used for any combination of medications, including your regular doses of hormone replacement therapy including estradiol, estriol, or testosterone, erectile dysfunction therapy, and is already popular for naltrexone.

### Common Troche Doses

- BiEst (80/20) □ 0.25 mg □ 0.5mg □ 1 mg □ 2 mg
- Progesterone □ 100 mg □ 200 mg □ 300 mg
- Testosterone □ 100 mg □ 200 mg □ 300 mg
- Tadavia □ 60/10 mg □ 100/20 mg
- LD Naltrexone □ 4.5 mg □ 6 mg

#### INSTRUCTIONS

- Place one troche in the buccal membrane against the cheek until it dissolves daily, as directed.
- Cut troche once for desired portion (1/4, 1/2 or 3/4) and place section in buccal membrane, as directed

*\*Other dosages, medications and combinations are also available as troches. Contact our pharmacy to learn more.*
