

Safeguard the confidentiality in your law firm

Legal professionals and law firms face regulations that require them to handle confidential data in a secure and compliant way. Also, their clients are demanding increasing levels of security, but traditional ways of sharing files over email, or accessing documents via FTP and VPN all have security flaws.

Tresorit is an end-to-end encrypted secure file storage and sharing solution that enables legal professionals to access files anywhere and collaborate internally and externally, while keeping confidential information safe and intellectual property secure. Using Tresorit helps you and your clients stay safe - insecure email attachments and other file transfer methods can be easily replaced with Tresorit links and their added control options.

SHOW CLIENTS THEIR SECURITY MATTERS TO YOU

END-TO-END ENCRYPTION FILE ENCRYPTION | Due to zero-knowledge technology, Tresorit cannot hand over or accidentally reveal any of your data.

HELP CLIENTS STAY SAFE | Insecure email attachments and other file transfer methods can be easily replaced with Tresorit links and their added control options.

KEEP CONTROL | Create download links to share files or folders with people outside your company. Keep control by setting up download limits, expiration dates, and a password for extra protection.

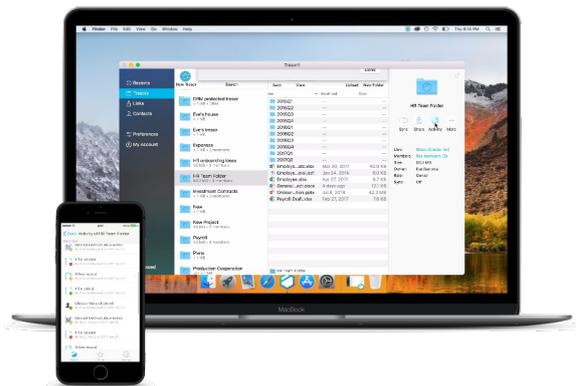

BULLET-PROOF PROTECTION

UPLOAD YOUR EXISTING FILE STRUCTURE | Keep the way you like to organize your files when you upload them to the cloud. No need to change what is already on your computer. Uploading a backup only takes a few clicks.

SYNC AUTOMATICALLY | Tresorit updates your files in real-time and automatically adds any edits you make to your online backup. That way, you and your partners can access the latest version of your data from any device.

RECOVER ANY FILE VERSIONS | Keep track of changes by your collaborators, solve version conflicts and use unlimited file versioning to roll back any previous version.

ABOUT SECUSOL | Secusol provides data security and privacy solutions to consumers, businesses and government agencies, prioritizing prevention as a key element in offering the best form of protection.
