A Message From Cleatus Cups™

Cleatus Cup™ began as a rainy day re-purposing project. We used a standard 6" boat cleat, a piece of 3" schedule 40 PVC, and a plastic test plug to create a beer mug that brought the beach to Central North Carolina. A design patent and three molds later, *Cleatus Cups™* are now manufactured, assembled, and decorated in Thomasville, North Carolina.

Thank you for taking the time to view our product lines of Cleatus Cups and Cleatus Coolers. We hope you will always find as much joy in using our products as we had in creating them.

SPECIFICATIONS

Using a patented six-inch boat cleat as a handle, Cleatus Cups™ are 6½ inches tall, 3½ inches wide, and hold 24 ounces of your favorite beverage.

MADE IN AMERICA

All Cleatus Cups™ are "MerMade in America". Our company is veteran owned and our manufacturing facility is located in Thomasville, North Carolina. We are "tied to American pride".

Mermade in America

FUN METER

Check out our Fun Meter™! Our Fun Meter™ is visible through the bottom of the cup to gauge your good times and warn you when you're running low.

ENVIRONMENTALLY FRIENDLY & BPA FREE

Our mission is to strive to be as environmentally responsible as possible by using BPA free polypropylene (body) and ABS plastic (cleat). Cleatus Cups™ are safe for use with hot and cold beverages.

FIVE YEAR WARRANTY

Virtually indestructible, Cleatus Cups™ should not crack, melt, shatter, or chip under normal wear and tear. We will replace them free within five years of purchase if they do.

The "Cleatus" Cooler, World's Coolest Cleat

The "Cleatus" cooler features a 3mm neoprene zippered bottle and a 3mm non-zippered bottle/can cooler. Both versions have a 6" nylon dock cleat re-purposed as the cooler handle. Printed with an approximate 3" wide x 3" high logo.

CUSTOM COLORS

Cleatus Cups™ can be produced in a variety of body colors and numerous cleat handle colors.

CUSTOMIZABLE

Cleatus Cups™ can be "cuptomized" with individual logos, messages, and artwork, using digital heat transfers.
