Restoring and New Timber Polish

Product	Restoring and New Timber Polish - Clear or Dark
Size	200ml, 1L, 2L
Description	This polish is designed as a starter polish for new work or furniture that has just been stripped back. Restoring Polish will bring out the natural grain of the wood, feed the timber and give a good initial sheen. Restoring Polish is excellent for restoring moisture to furniture that has become dry or faded and is effective on leather. The Dark Restoring Polish can be used on black or brown leather. Restoring Polish is not recommended for constant use on French polished furniture or other similarly sealed surfaces, as it may be too 'greasy'.
Used For	Timber, leather
Surface Preparation	Ensure the timber is well sanded and smooth. We recommend using a sanding sealer to reduce the amount of wax needed. Apply before waxing.
How to Apply	<ol style="list-style-type: none">1. Dip a soft, lint-free cloth into the tin and scrape out a small amount. Rub into the timber with pressure in line with the grain.2. Buff back any excess with a soft, lint-free cloth or buffing pads.3. Use up to three coats particularly if the timber is very porous, buffing well between coats. Allow up to an hour between coats to allow waxes to sink right in.
Dry Time	Minimum 30 minutes. Ensure the surface is touch dry with no fingerprinting before applying the next coat.
Maintenance	Depending on wear (as the surface becomes dull or dry). These natural wax finishes do breathe, so we recommend use of coasters and mats where applicable.
Clean Up	Warm, soapy water for hands or cloth. Excess wax on timber; dampen a cloth with d-Limonene or mineral turpentine.

Safety	<ul style="list-style-type: none">● Keep out of reach of children● Contains mineral solvent● Hang out rags to dry, or soak in water. Don't leave scrunched up● May contain traces of bee pollen & soy● Contact Gilly's for SDS
Ingredients	Beeswax, microcrystalline wax, carnauba wax, plant oil, low-odour mineral solvent, synthetic dye (Dark Restoring Polish)
