USER MANUAL

WAVERMINI VIBRATION PLATE

HELLO THERE.

Joel and I are athletes who suffered from severe ACL injuries a few months apart. We purchased multiple pieces of exercise equipment for our in-home rehab but were left disappointed and frustrated by fitness gear that made big promises but gave no support, no well-thought-out plan to follow, and no results. And that's how Lifepro came about, and why the Recovery + Fitness active recovery collection was created — we've set out to change all of that. It's why every piece of equipment bearing our name not only undergoes rigorous scrutiny to make sure it delivers on power and efficacy, but also comes with built-in support from our 'guiding angels' and a built-in lifetime warranty so that you're never left hanging.

Welcome to Lifepro.
We're in this together now.

Abe & Joel

Have you ever felt alone in your fitness journey?

We have, and we're here make sure it doesn't happen to you.

Not everyone can afford to hire a personal trainer or a team of professionals to help them feel and look their best. But the good news is: you don't have to. Lifepro brings the gym to you.

The Lifepro WaverMini boosts your metabolism and increases circulation, which forces your body to burn more fat and reduces the appearance of cellulite. The vibration plate creates a repetitive motion that forces your muscles to contract repeatedly. This technique works more muscle fibers than other forms of exercise, which means you're getting double the results without double the effort. The WaverMini is easy to use and will help you reach your goals faster than ever before.

If you have suffered an injury or you experience joint or back pain, find relief, and help prevent future injuries by adding the vibration plate to your rehab routine. Vibration plates are used by professional athletes, physical therapists, and rehabilitation centers everywhere.

Redefine your workouts and experience the transformative power of the Lifepro WaverMini:

- ◆ **Experience joint- and back-pain relief:** improves core strength & circulation
- ◆ **Boost your metabolism:** encourages your body to burn fat faster
- ◆ **Decrease your stress:** increases serotonin and decreases cortisol
- ◆ **Improve circulation:** decreases blood pressure
- ◆ **Increase strength & flexibility:** improves stability
- ◆ **Develop stronger bones:** increases bone density

The Rhythm can be used by people from every fitness level. If you have suffered an injury or you experience joint or back pain, find relief and help prevent future injuries by adding the Rhythm to your rehab routine.
