

*Follow our tips to keep your activewear in top condition*

1. Allow to dry immediately after wearing
2. Wash inside out
3. Wash in cold water only
4. Never use fabric softeners
5. Air dry
6. Do not wash with rough items like towels and denim

*Still smelly?*

*Try this!*

1. Presoak your clothes in white vinegar before washing. Use one part vinegar to four parts water and soak for 30 min. Or try adding a half cup of vinegar into the washing machine.
2. You can also pre-soak in baking soda. Soak for 30 min with 6 Tbsp of baking soda.
3. Do not use too much detergent. If there is too much detergent it will not wash out of the fabric completely, which can encourage more bacteria and smells.

Do not to overfill the washing machine. If it is too full

4. the clothes will not be washed thoroughly.
