1* USB cable

INSTRUCTIONS

1. If not plugging in the USB cord, then remove the cover on the battery compartment (located on the bottom of tank) and insert 3* AA batteries (Batteries not included) Ensure battery cover is back in place
2. Remove the plastic cap then remove the black plug on the top of the plastic aquarium and fill with water from the top. DO NOT overfill the container, leave a 5 – 10 mm gap from the top of the container.
3. Add 2-3 drops of dish soap into the water. Mix it in to dissolve and allow the bubbles to settle.
4. Remove JellyFish from packaging. Insert JellyFish upside down into the tank. Use a straw or stick to shake any air bubbles off the JellyFish once submerged in water.
5. Ensure the Aquarium is completely dry on the outside.
6. Place the plug back on the top of the aquarium. Place black cap back on. Make sure there is no leaks.
7. Place your batteries into the remote (requires 2* AAA batteries not included)

8. Plug the USB cord into the jellyfish Tank
9. Switch the power on, Your LED Memorizing JellyFish Aquarium is now ready for operation.

IMPORTANT NOTES:

- Try to avoid air bubbles in the body of the JellyFish. If necessary use a straw or stick to help turn them to remove the air bubbles
- Put rubber cap back on the top.
- Carefully hold JellyFish upside down with stick or straw to put into the water, filling inside of body with water before letting go of them.
- Please be patient – it may take up to 24hours for the JellyFish to “swim” normally to absorb enough water to float gracefully
- Change water occasionally when dirty
