## GAME VARIATIONS

This is a current list of game variations that we have for schools and events. We're always interested in hearing what games others come up with so we'll always be adding to this list.

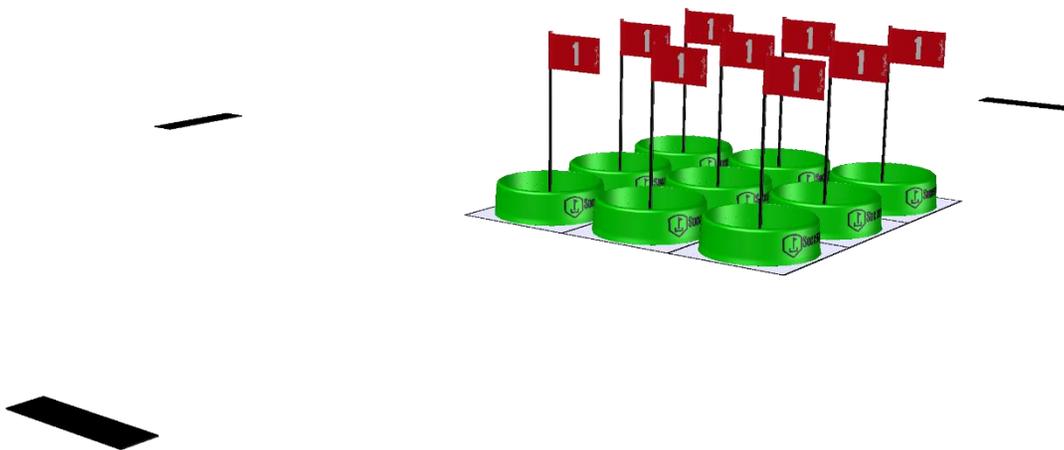

### 1Touch:

This is the game of cornhole but with a few changes. The first change is that you're using your feet to kick the balls instead of tossing a bean bag. And the second change is that you're allowed to assist your teammates kick with one touch. This makes the game much more involved and requires the kids to plan their next move. Our structured point system also makes the kids do some math in their head. **(requires at least 2 buckets and 4 balls)**

### Tic Tac Toe:

A classic game adapted for your feet and turned into a fast paced version. First team to score 3 buckets in a row wins. This game can also be played with up to 4 teams on a single grid. **(requires 9 buckets and 12 balls)**

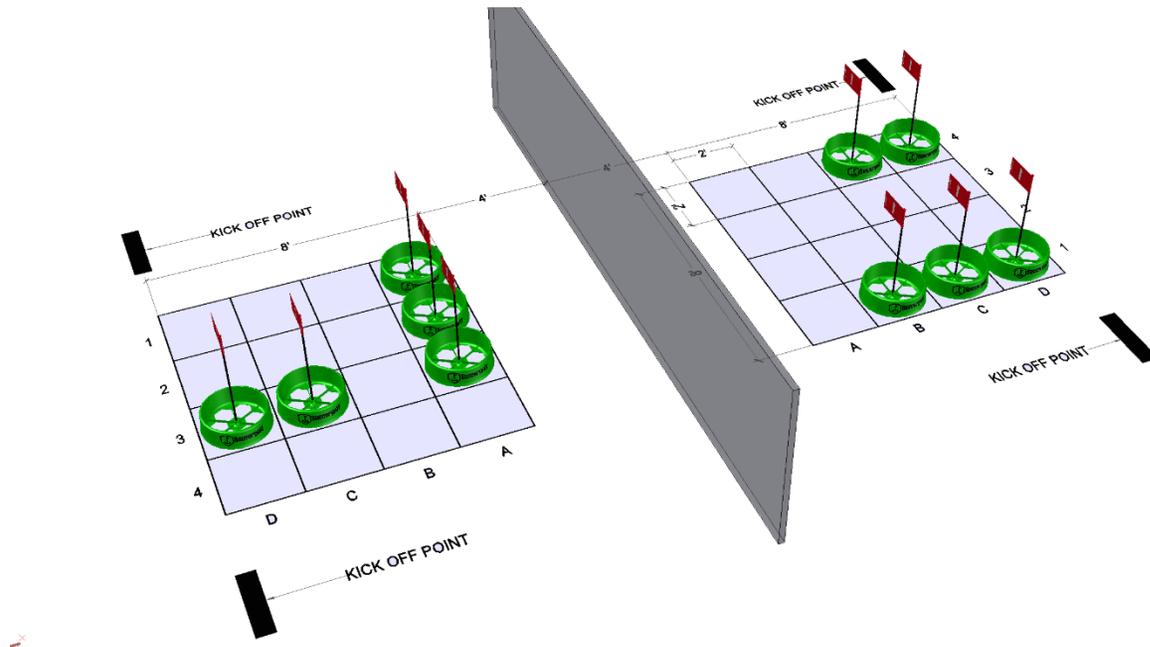

### Soccergolf:

This is the basic game of Golf played with a soccer ball and the main purpose of this game.  
**(requires at least 1 bucket and 2 balls)**

### Battleship:

That right it's Battleship!! Now when we play this game, we always use our feet but you could use your hands to toss the balls instead. Start by creating a 4x4 grid and place the buckets together like ships. Three buckets is an Aircraft Carrier and two buckets is the Battleship. Each team will fire 3 balls and then mark them on their grid paper (we will provide the PDF version of the grid for keeping track of hits and misses). The kids can then plan out the next group of shots. You can have as many kids on a team so long as each one has a ball to kick or toss. **(requires 10 buckets and 6 balls)**

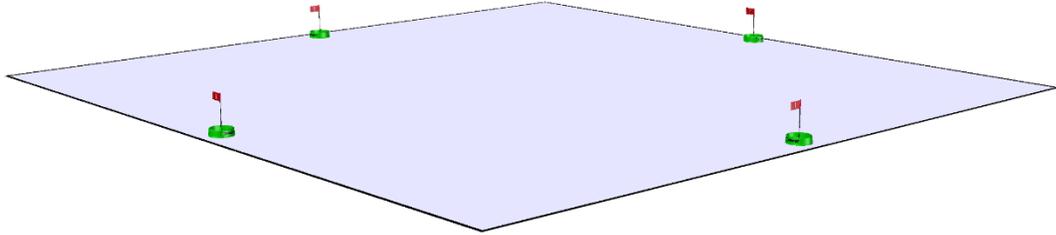

### Dodgeball

Pretty simple rules here. Don't get hit and eliminate all of your opponents!! Designate an area out front or inside and use as many balls as you have lying around. Since the balls are very light we recommend making the playing area smaller than normal. You also don't have to worry about anyone getting hurt since the balls are soft. **(requires 0 buckets and at least 1 ball per person)**

### Capture the Flag:

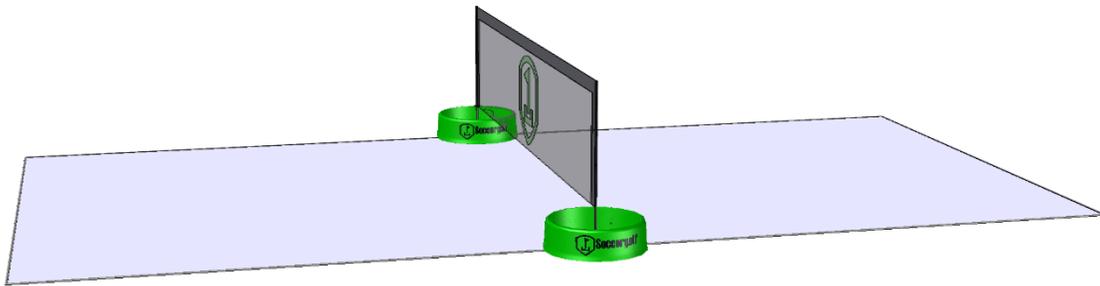

This is a game kids like to play online so we adapted it to be played with our buckets. Each team starts next to their bucket and takes turns kicking towards the enemy bucket. You eliminate a team by kicking your ball into that teams bucket effectively capturing their flag and removing them from the game. You can play with as many different teams in the same area as you want so long as each player

has a ball. This game will teach the kids about pre planning and also about defense. They can decide to advance with all their team balls or keep a few back to play defense. This game will quickly become a fast paced version of Chess. **(requires 1 bucket per team and 1 ball for each player)**

### Footvolley (Volleyball with your feet)

This is a fast paced team game and the rules are simple. You can have a maximum of 3 kicks in order to get the ball on the other side. You score anytime the other team can't return the ball. Play to 11 or 21 and every score is worth 1 point. **(requires 2 buckets and 1 ball)**

### Volleyball

This is traditional Volleyball except you can use our soft style balls. This makes it much easier on the kids and safer. **(requires 2 buckets and 1 ball)**
